FUNCTIONAL SPECIFICATIONS

PAGE DESCRIPTION: The Main Navigation of the Max Steel site. Navigation copy will be localized for language, but all content and links remain consistent across markets.

A. MATTEL GLOBAL HEADER

The Mattel Global Standard Header is present in North America only and will not be localized.

B. SITE LOGO

This is the logo for the site. Clicking here will return the user to Home. This is also Steel's dock that he comes from and returns to after talking to the user.

C. MAIN NAV

The Main Nav contains the following:

D. GAMES BUTTON

This button takes the user to the Games index page.

E. VIDEOS BUTTON

This button takes the user to the Videos section.

F. N-TEK FILES BUTTON

This button takes the user to the N-Tek Files index page. On rollover, the user can quickly link to one of the content subpages.

G. N-TEK LAB BUTTON

This button takes the user to the N-Tek Lab index page.

H. TOYS BUTTON

This button takes the user to the Toys index page. On rollover, the user can quickly link to a pre-loaded category. For launch, all markets will show a coming soon page.

I. PARENTS BUTTON

This button takes the user to the Parents page.

J. LOGIN/REGISTER LINK

Launches the Janrain login/register modal window where the user can choose to log in or register.

When logged in, the links update to "My Profile" and "Log Out."

K. ENTER A CODE LINK

This link expands the user's dashboard to the code panels. If the user is logged out, he will be prompted to log in first.

L. LANGUAGE/COUNTRY DROPDOWN

Allows the user to select the language/country to view content. Location will be pre-selected based on geo-detection. Once the user changes his selection, this setting will be saved for future visits (in a cookie) until the user changes it again.

Dropdown always displays selected language/country. Selections are formatted as Language (Country/Region) with the Language being translated and country/region remaining in English. Selections are alphabetized by country/region.

LOCALIZATION:

Global: All live text (pink) on all pages will be sent to World Server for localization/language translation. Requirements should be created at the translation level to indicate which character names and key phrases should be left in English.

The following items will NOT be localized:

- Mattel Global Header
- Username choices from dropdown menus (TBD)
- Max Steel logo

LOCKED/UNLOCKED CONTENT:

N/A

N-TEK FILES

- ARCHIVE
- TURBO CHAMBER
- CHARACTERS
- VEHICLES
- WEAPONS
- LOCATIONS

Sections with subcategories will have a dropdown treatment from the Main Navigation to allow users to quickly jump to a subcategory or page.

Sections with subcategories at launch:

- N-Tek Files

Sections with subcategories in Phase 2:

- Toys

B

The International Rollout (19 other markets) is introduced in phase 2.0.

In July the teasers for the digital comic downloads from Viz. (Assuming we don't want download to user desktop...would need special display) will be introduced in phase 3.5

The Rise of Elementor website takeover will be introduced in phase 4.0

Sound effects: play on rollover of buttons and CTA's will be introduced in a future phase (TBD). Need sufficient amount of sounds for launch.

Homepage CDA animation will be added at a later phase (TBD). Can hardcode animation for launch - temporary solution. Will need to explore options after launch. For launch - CDA's can be localized.

Animations in general will be introduced in a later phase (TBD) Need to regroup internally and determine what is feasible for launch.

Mobile responsive design will be developed (TBD).

Based on corporate initiative, "Friend-ing" will be introduced in a future phase (TBD)

Canned chat will be dependant on "Friend-ing" at a later phase (TBD).

Meta-game currency and virtual items will be introduced in a future phase (TBD).

Gifting will be introduced at a later phase (TBD)

FUNCTIONAL SPECIFICATIONS

PAGE DESCRIPTION: This home page container is the primary template for the site. It contains the Max Steel Main Navigation, a large CDA to feature promotional content and four secondary CDA buttons in the footer. Content on the home page may be localized.

A. MAIN NAVIGATION

The main navigation will contain a link to the home page (logo) and the global links to the main sections. It has been designed to accommodate up to 8 global nav links if needed in the future, but there must always be an even number of links.

B. UTILITY NAVIGATION

The utility navigation lives above the main navigation and is used to handle secondary links such as the country selector and help button.

C. PAGE TITLE

Every page other than the home page will have a page title/header at the top left to let the user know where he is in the experience. In sections with multiple levels of navigation, a breadcrumb header style will be used so the user can use this area to navigate back or jump to other sections.

D. PRIMARY CDA

The primary CDA on the home page will feature promotional frames that can be localized per market. These CDAs can include full-page video, flash objects or javascript animations and static jpgs.

E. USER DASHBOARD

The footer area will be used to house the user dashboard, which handles login, registration and metagame content as well as a news flash section that updates daily.

F. STATIC PROMO AREAS

The static promo areas contain four CDAs for deep-links to internal pages. The header for each of these links will utilize an action word. These promos will be section-specific and handled through the CMS. This area has the option to localize these promos per market through the CMS.

G. PROMO AREA OPTIONS

The promo area can house 2, 3 or 4 static promos. In the event that fewer than 4 promos need to be displayed, the left and right promo areas can be combined into a larger promo space.

G Footer Option: 3 Promo Areas

Footer Option: 2 Promo Areas

LOCALIZATION:

All text and video on this page will be localized for language. Primary and secondary CDAs can contain localized content to show different promotional content in each market.

FUNCTIONAL ANNOTATIONS

DESCRIPTION: Registration and login uses the **Janrain** workflow. Clicking on a login or registration CTA anywhere on the site will bring up the **Janrain** sign up/sign in modal window. This first screen allows the user to choose between signing up and signing in.

A. SIGN IN PANEL
The user enters their:
1) Username
2) Password

B. CLOSE BUTTON
The user closes the panel here.

C. SIGN IN BUTTON
When the information in the Sign In section is filled in, the user then clicks this button to sign in.

D. SIGN UP PANEL
The user can sign up for a membership here. Included is:

1) Sign Up Now! Button
2) Forgot Your Password Button
3) Forgot Your Username Button

E. LEGAL
This is the legal copy of the popup.

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

FUNCTIONAL ANNOTATIONS

DESCRIPTION: This is the second screen in the Janrain workflow and prompts the user to register for an account on MaxSteel.com by filling in the appropriate form fields.

A. SIGN UP PANEL

The user enters their:

- 1) Username
- 2) Password
- 3) Secret Question
- 4) Secret Answer

B. CLOSE BUTTON

The user can close the modal window to exit registration.

C. AVAILABILITY INDICATOR

After the user chooses a username by selecting words in all 3 dropdown menus, this indicator displays whether the name is available. If not available, an indicator will appear informing the user.

D. NEXT BUTTON

When the information in the Sign Up section is filled in and username has been validated as available, the user can click this button to submit the registration form.

E. SIGN IN PANEL

The user can sign in to their membership here. Included is:

- 1) Log In Now! Button

F. LEGAL

This is the legal copy of the popup.

LOCALIZATION:

All text on this page will be localized for language except for the text in the username dropdowns, which will be in English for every country. Content will remain the same across all markets.

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: The share pop-up appears when the user clicks on the share link.

Share exists for:

- Wish list
- Videos
- Games
- N-Tek file entries
- Toys

A. SHARE TITLE

Title of the share window indicating what the user is sharing.

B. INSTRUCTIONAL COPY

Instructional copy to explain the email form. Any legal disclaimers required will also be displayed here.

C. EMAIL ADDRESS FORM FIELD

User enters recipient's email address here. A simple form validation checks to make sure the form field is filled and that conventional email syntax is followed. Error messages are handled inline.

D. SUBMIT BUTTON

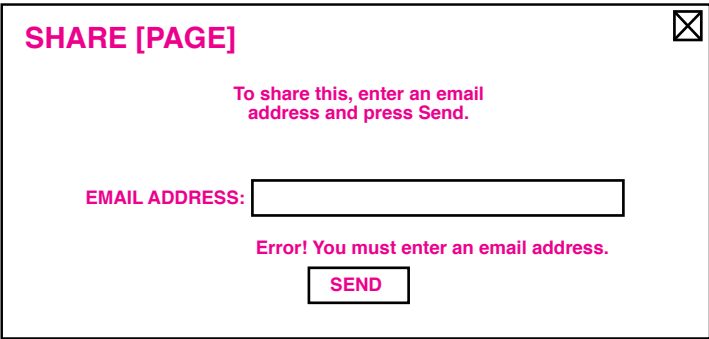

User clicks submit to send a link to selected content to recipient. Recipient email address is used only to send the email; it is not stored. After an email is successfully submitted, a confirmation message is shown. **Are we going to rate/limit the frequency user tries to share/send an item? Want to make sure we protect against spambots or hackers that can repeatedly use this form to jam our system.**

E. CLOSE BUTTON

User can click on the close button to cancel and return to the wish list panel.

Share wishlist will be introduced in phase 2.0 (OK'd by DIG)

ERROR MESSAGE

Error! Email address must be in the format abc@domain.com.

CONFIRMATION MESSAGE

STEEL FLIES OUT

FUNCTIONAL ANNOTATIONS

DESCRIPTION: Alerts and notifications on the website will be handled through a pop-up window from the dashboard. Any notification windows appear and after 10 seconds disappear. If there are multiple they will stack on top of each other.

A. STEEL FLYOUT

Steel flyout notifications will be reserved for instructional copy and random humor in specified areas of the website. This copy will be static and triggered by page loads.

- First site visit
- **During registration**
- During Ultralink editor
- First visit on content pages

B. METAGAME ALERTS

These notifications will be communicated through a small notification window from the user's dashboard panel and can include alerts such as hero points rewarded, badges rewarded or new missions.

Alerts will be delivered by a show character, primarily Forge Ferrus, Max and the user's Ultralink. Messages include:

- New Mission
- Mission Reminder
- Completed Mission
- Badge Awarded
- Trophy Awarded
- Unlocked Item

WEBSITE ALERTS

These notifications will be communicated through the same notification window but will be triggered manually or with a scheduled algorithm. They will be used to communicate:

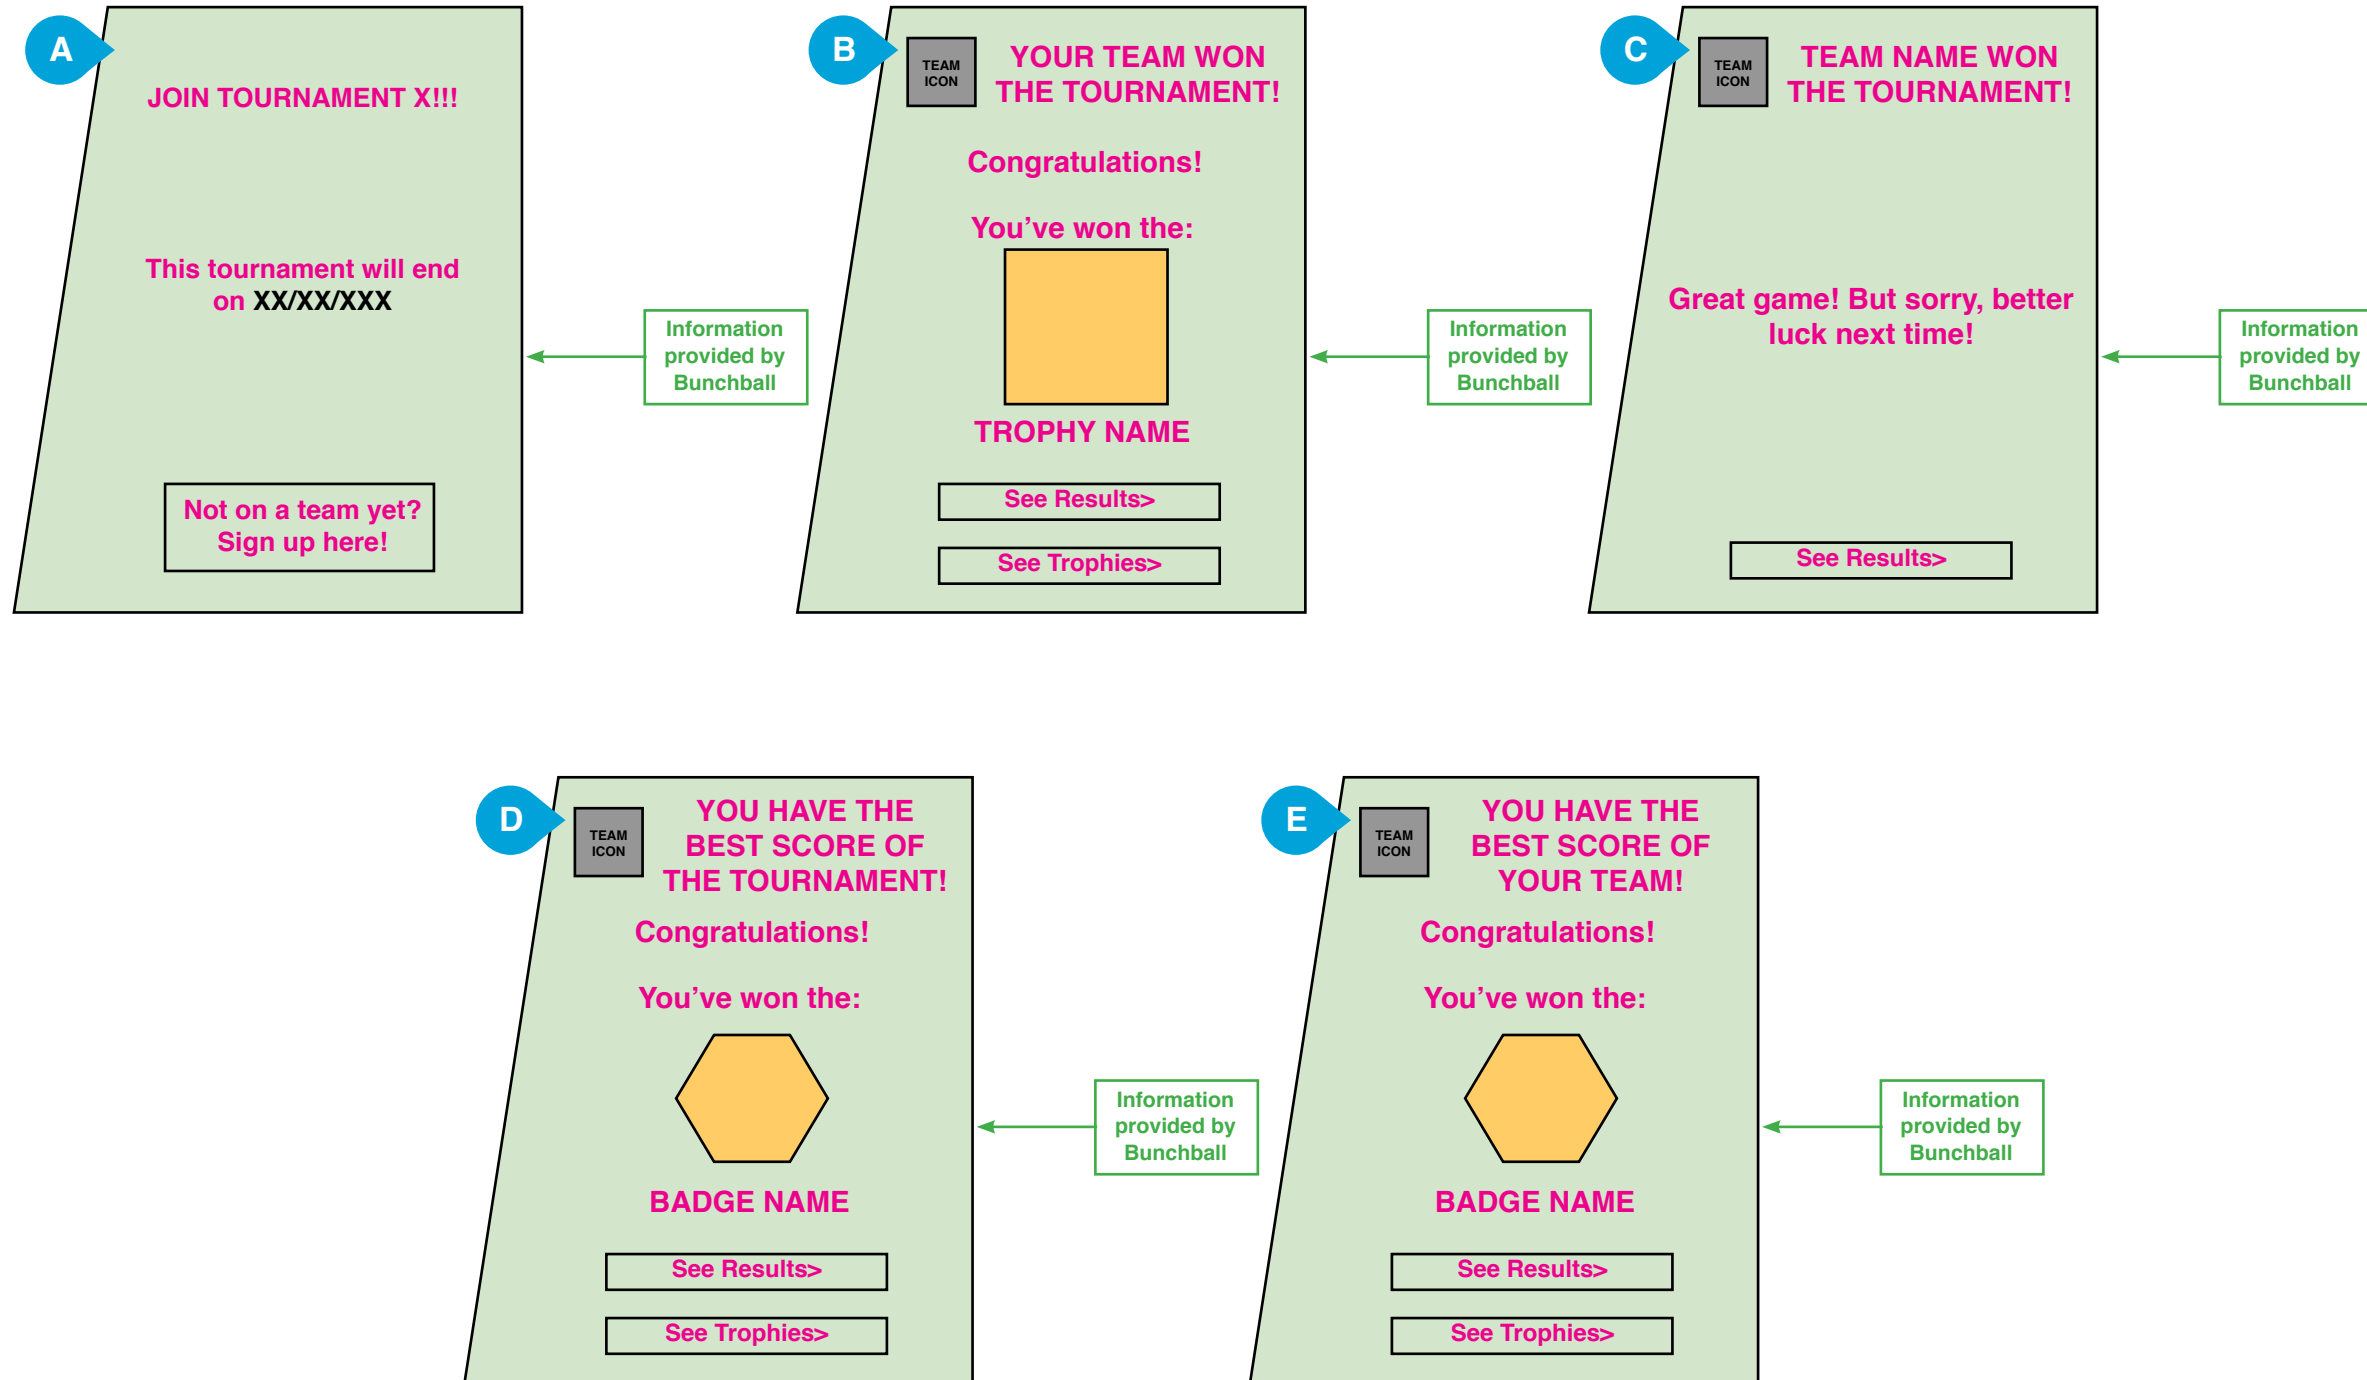

- New content launched (videos, bios, locations)
- New tournament starting
- Tournament reminder
- Tournament ending soon
- Tournament ended, check results
- New challenge starting
- Challenge reminder
- Challenge ended
- New games
- New game levels released

C. LEVEL UP ALERT (FROM MAX STEEL)

The level up alert is larger and includes the following information: new level reached, items/content unlocked, effort to next level, CTA to missions.

Notifications from additional characters (Forge, Ferris, Etc.) will be introduced at a later phase (TBD). Phase 1 has Max/Steel/Dredd.

FUNCTIONAL ANNOTATIONS

DESCRIPTION: Alerts and notifications on the website will be handled through a pop-up window from the dashboard. Any notification windows appear and after 10 seconds disappear. If there are multiple they will stack on top of each other.

A. CHALLENGE START ALERT
Registered users get this alert when a new challenge starts. The user can take the challenge by clicking the challenge cta (7.3.6).

B. CHALLENGE OVER ALERT
When the challenge is over, all of the participating users receive the specified badge. The user can see their badges by clicking the badges cta (7.1.2)

C. CHALLENGE EXTENDED ALERT
Registered users get this alert when a challenge has been extended. The user can take see the current challenge by clicking the see the challenge cta (7.3.6).

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: This is the layout of the quiz modal.

A. QUIZ MODAL WINDOW

The quiz modal window appears anywhere on the site. If the user has completed the quiz correctly in the past, they will not be served the same quiz again.

Note: Quizzes can pop up on content pages such as N-Tek Files, Videos and N-Tek Lab. **TBD: Requirements need to be written around when and where quizzes are served up.**

B. CLOSE QUIZ BUTTON

This button closes the quiz modal if the user wishes to skip the quiz. Once a user skips a quiz, they will not be served the same quiz again.

C. QUIZ ANSWER SELECTION

Quizzes are multiple-choice.

D. QUIZ POINT AMOUNT

The possible hero point award amount is displayed on the quiz question modal.

E. QUIZ SUBMIT BUTTON

User clicks the submit button to submit their answer.

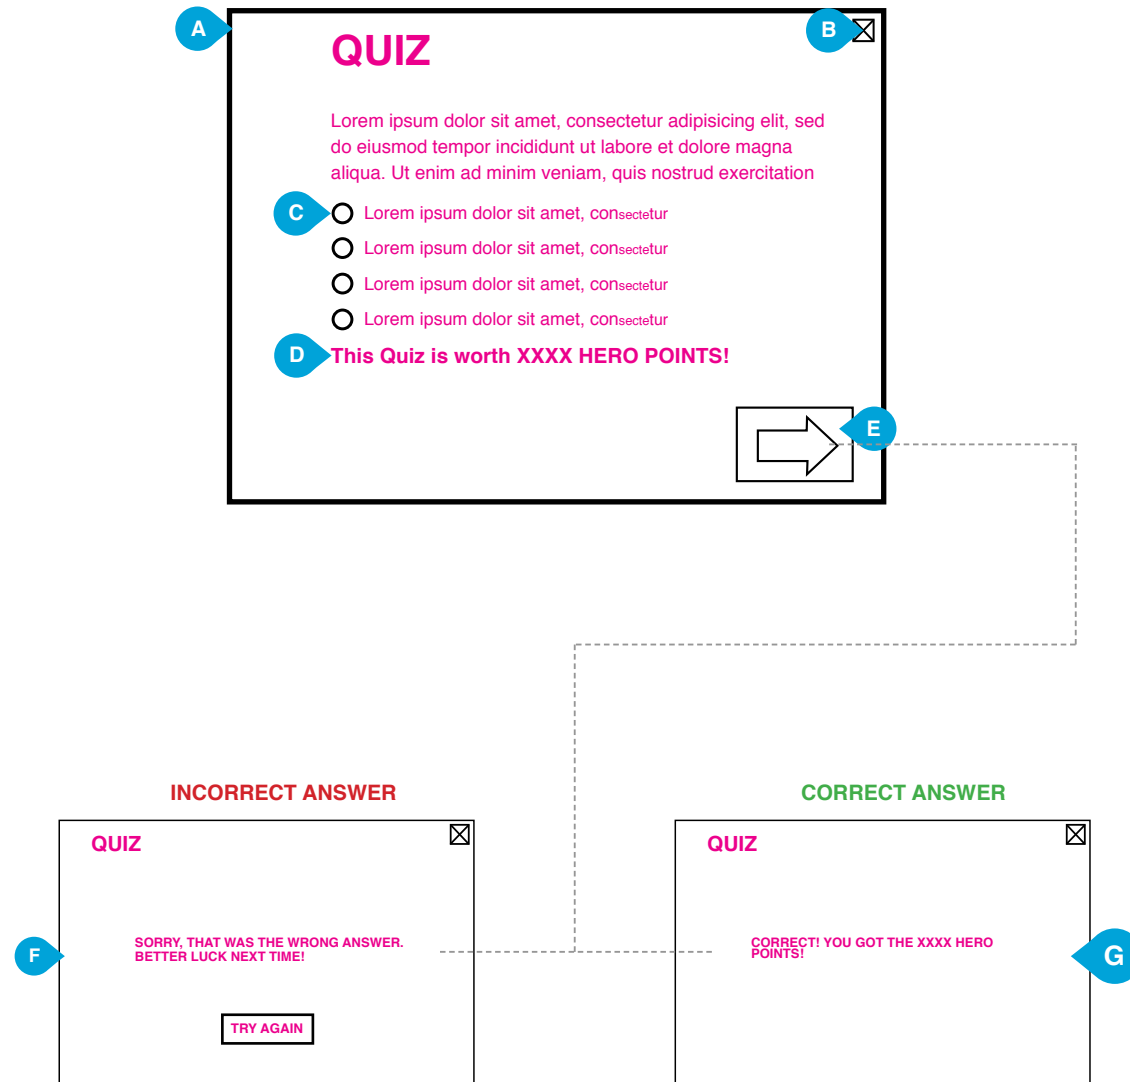

F. INCORRECT ANSWER SCREEN

This screen is displayed if the user selects the wrong answer. User can try again or close the modal.

G. CORRECT ANSWER SCREEN

This screen is displayed if the user selects the right answer. The user can only close the window.

Quizzes will be introduced in a later phase (TBD).

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: Polls can pop up anywhere on the site. **TBD: Requirements need to be written around when and where polls are served up.**

Phase: **TBD**

A. POLL MODAL WINDOW

The poll modal window can appear on any content page and will be set on a timer (for example, 10 seconds after page load). If the user has completed the poll in the past, they will not be served the same poll again.

B. POLL ANSWER SELECTION

Polls are multiple-choice.

C. POLL POINT AMOUNT

The possible hero point award amount is displayed on the poll question modal.

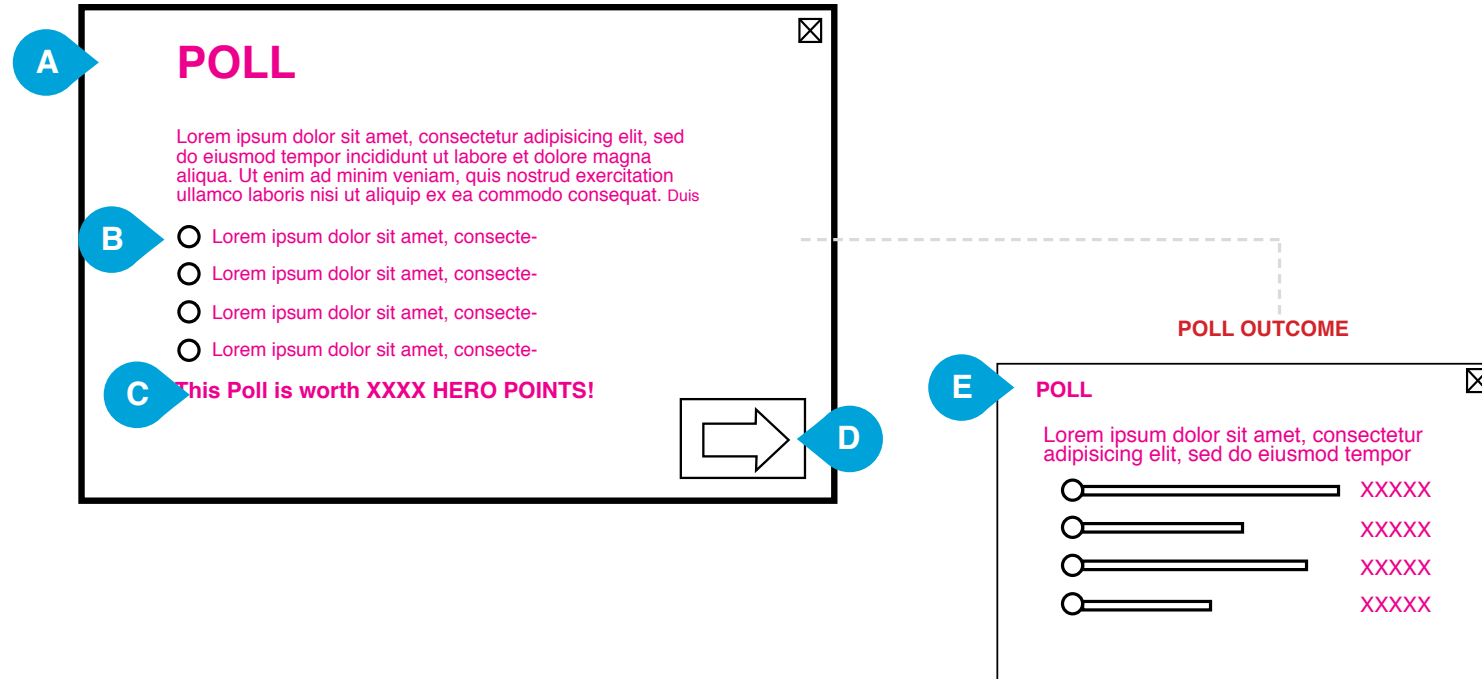

D. POLL SUBMIT BUTTON

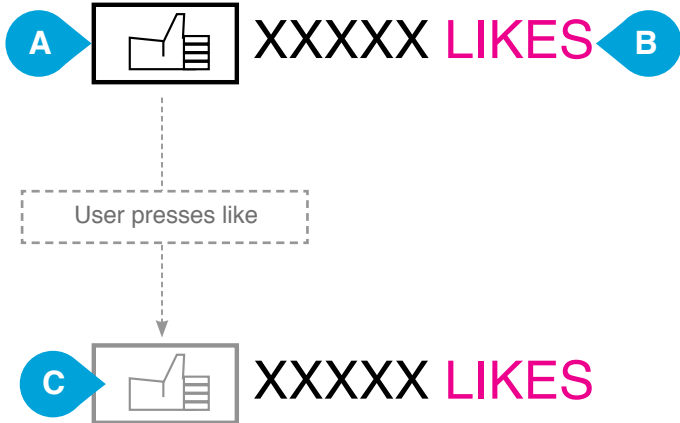

User clicks the submit button to submit their answer.

E. RESULTS SCREEN

Upon submitting an answer, the results screen loads the current poll tallies.

Polls will be introduced in a later phase (TBD).

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: A click counter will be used for like functionality. The like feature will have 3 states: off state (displays the number of likes), rollover state (on rollover) and on state (displays the number of likes, and an indication that the user has already liked the item). On click, the counter will go up by one and the off state will change to an on state. Likes are stored in the user's profile and will remain logged when the user returns to the site. For users who are not logged in, their like will be stored in a cookie for return visits.

A. LIKE BUTTON (CLICKABLE)
The user presses this button to like a subject.

B. LIKE COUNT
This is the like count for the subject.

C. LIKE BUTTON (CLICKED)
This is the like button after the user has used it to like a subject.

COUNTER AT LAUNCH
Option to assign a random start number for every likable item to avoid launching with low like counts.

Likes will be introduced in a future phase (TBD). For launch an image will be used instead of functionality.

MAX STEEL • LIKES	
User Experience and Information Architecture	v 7.0
File: MTL_MaxSteel_UX_7.0.indd	19 of 85
Last Modified: 12/20/12	

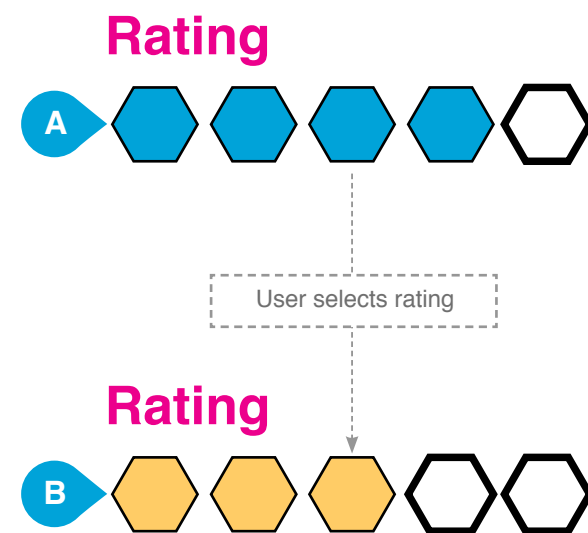

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: A 5-star rating system allows the user to see the average rating for the game and to rate the game. There is an off state (average rating before the user rates), rollover/click state (when user is interacting with the ratings) and an on state (average rating after the user rates the game).

A. RATING (NON USER RATED)
The rating as it appears before the user rates an item.

B. RATING (USER RATED)
The rating as it appears after the user rates an item.

Ratings will be introduced in a later phase (TBD).

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: This page shows the story mode menu window. By default this page will show the user the last level they have reached and allow the user to continue the game play. Or, the user can select a previously played level to replay that level for a high score or rewards. User may share or like this page.

A. OPEN LEVEL
This thumbnail indicates a previously passed level that the user can choose to replay. On click, the achievements and leaderboard below refresh to reflect the selected level. The CTA also changes from "continue" to "play". **Note: replaying a previous level does not reset the user's latest save point. When they return to this page they can still continue where they left off. TBD**

B. CURRENT LEVEL
The thumbnail for the current level will look slightly different, to show the user that this level contains the user's last save point. This is the default level selected when the user loads this page. **Clicking on continue will drop the level to the last save point.**

C. LOCKED LEVEL
Locked levels will be grayed out and have a lock icon to indicate that it is not available to the user.

D. GAME CTA
This dynamic CTA lets the user know whether he is continuing or replaying a level. On click the game swf will load in this game container area.

E. CLOSE STORY MODE LEVEL WINDOW
This arrow closes the story mode level window to the left.

Unlocking levels in mini-games will be introduced in a future phase (TBD) Need to parse bunchball data for user's progression, then build rules engine to manage unlock rules for content. Managing rules around them. SIMPLIFY TO ONE ACTION OR USER LEVEL.

MATTEL FOOTER

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: This is the videos index page. The top three modules display random videos tagged as featured, new or popular. This page also allows the user to sort by character or category.

A. CATEGORY LINKS
A category list appears on the left. Clicking on a category allows the user to jump to an individual video in that list (2.2). Note: There can only be 10 videos per category. When the user presses "See All>" all of the videos in that category are displayed via video listings (2.1)

B. VIDEO PAGE INTRO
Introductory text that only appears on the index page.

C. FEATURED VIDEO PLAYER
The featured video will play directly on the index page. The CMS will allow up to 5 featured videos to be tagged to play in this area. Upon page load, a random video from that pool will be displayed here. Autoplay is enabled.

D. NEW VIDEO LINK
A thumbnail, title and link will randomly display one of the five most recently uploaded videos.

E. POPULAR VIDEO LINK
A thumbnail, title and link will randomly display one of the five most popular videos based on view counts or likes (if we do not launch with view counter).

F.VIEW BY CHARACTER
User clicks on a character to bring up the listings page (2.1) with the selected character as the listing reference.

G. CATEGORY LINKS
Category links are repeated on the main index page with an associated image or description to give visual context around the category choices.

Tagging videos so that users are constantly served up fresh content will be introduced in a later phase (TBD). DIG confirmed OK for phase 2, but would rather have an "auto-scroll" feature.

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: This is the video listings page used to list videos when a user sorts by category, character, weapon or vehicle. User gets to this page by clicking a category, a character on the video index page, or a tag link on an individual video page.

A. CATEGORY NAME
 This is the name of the category or the listing reference which can be a tag, such as character, weapon or vehicle. For category, breadcrumb navigation will be shown.

B. VIDEO COUNT
 This is the number of videos in the category. Option to assign a random start number for every likable item to avoid launching with low like counts, or to hide the counter at launch and display it once the counts get to a higher number.

C. FEATURED VIDEO
 The first item in the list will be displayed as a featured video, with a larger image and added video description. All remaining videos will be listed below in chronological order from newest to oldest. (Sorting by **unwatched TBD**)

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The N-Tek Lobby is the main index page for the N-Tek subsections.

- A. LINK TO TURBO CHAMBER**
User clicks to go to the Turbo Chamber page.
- B. LINK TO CHARACTERS**
User clicks to bring up the character modal.
- C. LINK TO VEHICLES**
User clicks to bring up the vehicles modal.
- D. LINK TO WEAPONS**
User clicks to bring up the weapons modal.

Maintenance will be needed for the N-Tek files for the following:

- Swap in transformation modes as they are available.
- Add in character interview animations to come April 15th.
- Add in rest of the character 360's (TBD)
- Ultralink Editor: more parts/textures/accessories.
- Profile: Add additional flags throughout the year (TBD).
- Add more printables: DJ Cole ringtones/music, downloads, buddy icons, other personalization stuff.
- All Additional locations (TBD)

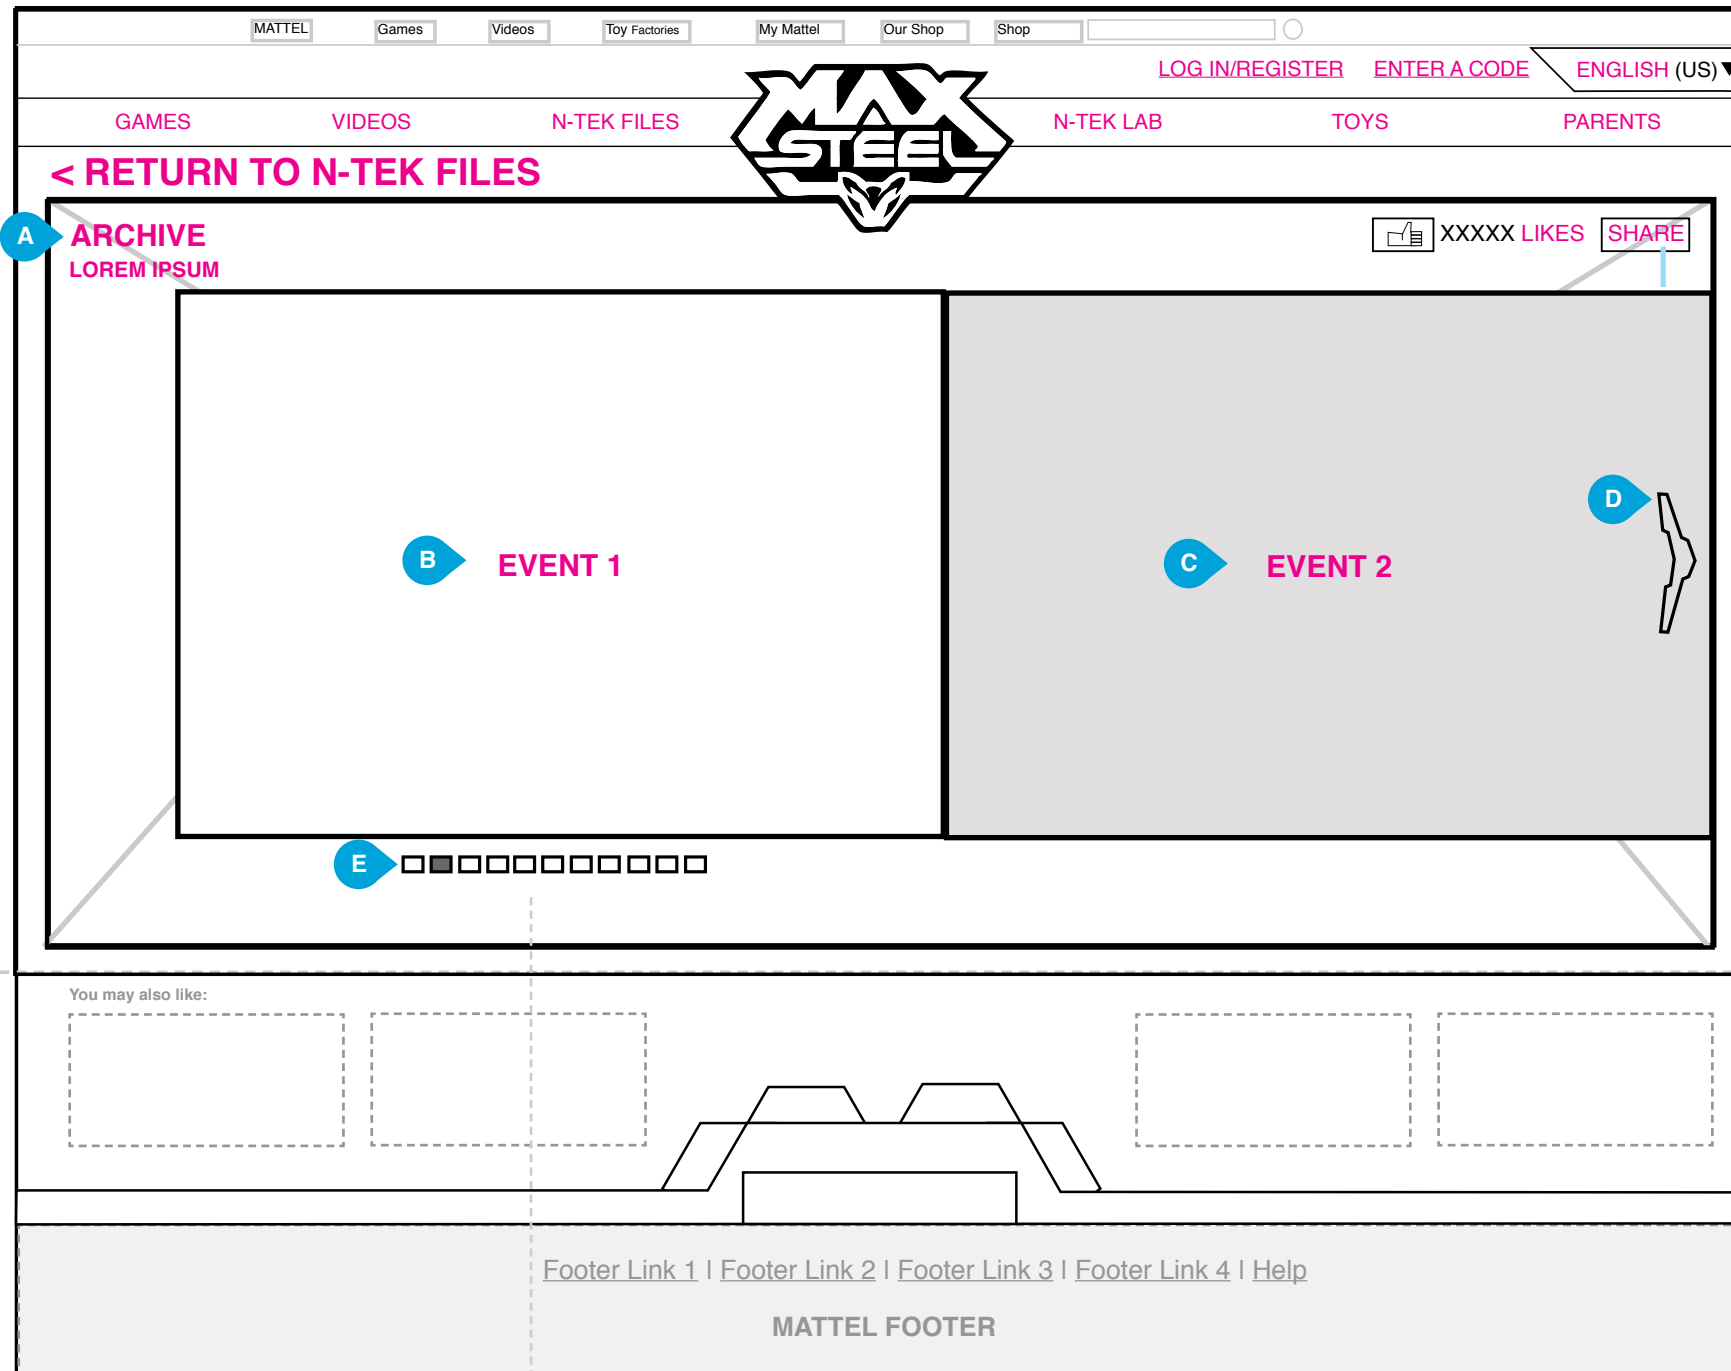

PAGE TEAR

LOCALIZATION:
All text and video on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:
N/A

Accesses the available content on the timeline.

User Experience and Information Architecture		
File: MTL_MaxSteel_UX_7.0.indd		v 7.0
Last Modified: 12/20/12		33 of 85

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The archive page will feature 8 to 12 events in a linear timeline. 2 or 3 events show at a time and the user can side scroll to view more items. Users can roll over or tap an item to bring up a short description which can include an associated CTA to a game, bio page or video.

A. TITLE
A title and description to give context around the story told through the archive/interactive story.

B. TIMELINE EVENTS
The events in the timeline feature a series of stills that visually progress as the user scrolls. Events are organized into dynasties which will denote sub-series of events that will be distinguished by a visual cue in the background.

C. ACTIVE EVENT
As the user scrolls to the left or right, one event at a time is denoted as active, and will display a discreet animation. Active events are reflected as highlighted in the event links below.

D. MOVING THROUGH THE TIMELINE
The user can move through the timeline in 3 ways:
a) User can click on the right (or left) arrow to scroll.
b) User can use the keyboard to scroll left and right.
c) User can swipe left and right on a tablet or mobile.

E. EVENT LINKS
A series of small links will allow the user to quickly jump to other events in the timeline. An "on state" will be used to visually inform the user where they are within the timeline. Dynasties and events can be added at any time and the events links will be updated to reflect added events. When a historical event is added, the default event can still be Event 1 but the user now must scroll left to access the historical event.

The archive section will be introduced in a future phase (TBD). When it would be implemented, the button will appear in the N-Tek files page (3.0).

PAGE TEAR

LOCALIZATION:

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The Turbo Chamber features an interactive tool where the user can click through video clips of Max transforming between turbo modes. To view the videos, the user can either click on a thumbnail or scroll left and right through the series of videos. User can share the Turbo Chamber page or like individual turbo modes.

When Turbo Chamber page loads it defaults to the very first item in this section.

A. RETURN TO N-TEK FILES BUTTON

This takes the user back to the N-TEK Files.

B. TURBO MODE VERTICAL NAVIGATION

A series of links allows the user to quickly jump to a turbo mode video.

C. TURBO MODE DESCRIPTION

A title and short description for each turbo mode.

D. TURBO SLIDER

As the user slides left and right, the image display goes through a series of stills to simulate Max and Steel going turbo in the various turbo modes.

MODES AVAILABLE AT LAUNCH (TBD):

- Turbo Base Mode
- Turbo Flight Mode
- Turbo Strength Mode
- Camo Mode (Not on video list)
- Turbofied Steel (Not on video list)

LOCALIZATION:

All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:

N/A

The page loads with an image of Max and Steel as separate bodies and introduces the user to both characters.

When the user clicks on "Turbo Base Mode" a video animation plays to show the transformation of Max and Steel into turbo base mode.

As the User scrolls through the available mode samples, the associated video plays.

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: This is the character bio template. This page displays an example Max Steel bio which has turbo modes in addition to the standard bio content. Users can like or share individual character pages.

A. CHARACTER VERTICAL NAVIGATION
Allows the user to quickly jump to a specific character in selected category. Locked characters will be displayed but not clickable.

B. SCROLL UP/DOWN
Allows the user to scroll up and down through character files in the chosen tab/category.

C. CHARACTER CATEGORY
Characters will be split up into three categories, and the category selector will stick to the bottom of the browser window, allowing the user to select a category without scrolling below the fold.

D. LOCKED CONTENT
Locked content will display as a grayed-out area with a lock icon. A rollover (or tap) can be used to show the user how to unlock this content.

For example:
"Tune in next week to see this character revealed."
"Reach hero level 20 to view Max's secret video."

E. TURBO TRANSFORMATIONS
Clicking on a thumbnail opens the turbo mode image in a modal window with a "see more" CTA that links to the appropriate turbo mode in the Turbo Chamber.

N-Tek Lab

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The N-Tek Lab section houses the Ultralink Editor and Downloadables pages. All content in this section is available in both the logged in/logged out states.

A. ULTRALINK EDITOR

The first module displays a generic ultralink image to depict the Ultralink Editor. **TBD: Or is this the user's ultralink?**

B. LINK TO ULTRALINK EDITOR

User clicks on this button to launch the Ultralink Editor in the same window.

C. SECURITY BADGE

The second module displays the user's security badge. Username is passed in from **Janrain**. Level information and recent badges are pulled from **Bunchball**. **If a user is not logged in, this module disappears. (TBD)**

D. LINK TO PRINT SECURITY ID

User clicks on the print button to send the security ID to the printer.

E. DOWNLOADABLE BUTTON

This button takes the user to the downloadables page.

LOCALIZATION:

All text on this page will be localized for language. Content will remain the same across all markets.

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The Ultralink Editor loads with a short animated video of Steel welcoming the user to the experience. For LAAM users, this will help introduce the user to ultralinks.

Intro should appear on user's first visit to the Ultralink Editor only.

Note: This will either be a video, image or copy. Content TBD.

LOCALIZATION:

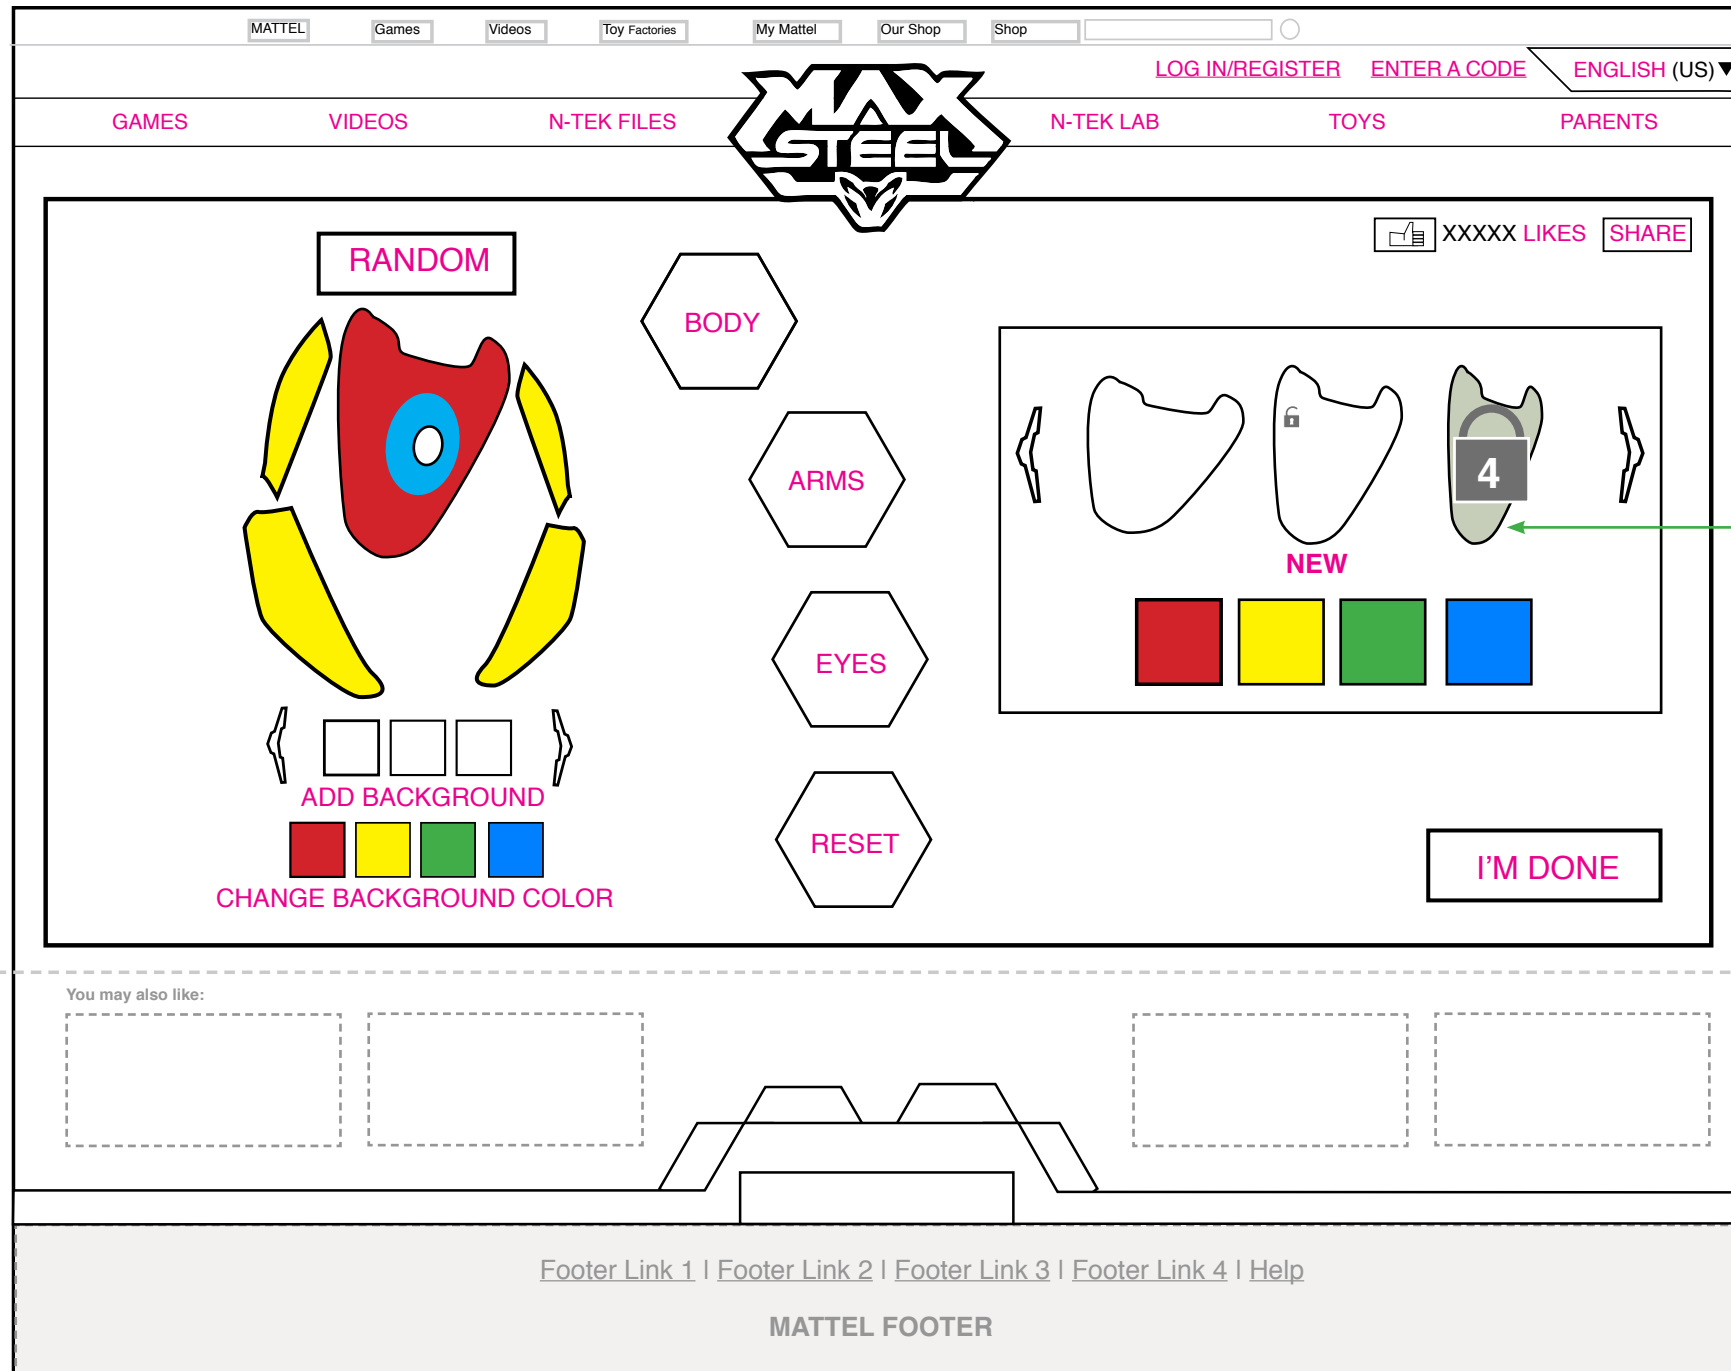

All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:

FUNCTIONAL ANNOTATIONS

PAGE DESCRIPTION: The Ultralink Editor is where the user can create or edit their ultralink avatar. There will be a lazy login/registration feature that allows the user to create an Ultralink before logging in or registering. For first-time users, the default ultralink will look like Steel. For existing users, the editor will start with their current saved ultralink.

See Steel_Customization.PDF.

Note: Visual representation shown as concept only. Full functionality and customization options TBD.

- Customization Options for Launch:
- 4 Elements (Body, Arms, Eyes, Background)
 - Each element will have its own color choices
 - Final number of variations for each element and colors TBD

- Suggested Metagame Options:
- Unlockable shapes and colors in a future phase

- Asset Requirements:
- Body shape must be created in such a way that arm positioning stays consistent.
 - Eye shape/size must be created in such a way that positioning stays consistent.
 - Body elements must be designed in such a way that color layers on a PNG layer can easily be switched out.

Steel Message: A flyout Steel message will include buddy humor and help the user along.

The user can reset the ultralink to default.

If the user is not logged in and clicks on the "done" button, he will be prompted to log in or register.

Naming your Ultralink will be introduced in a later phase 2.0 (Ok'd by DIG)

LOCALIZATION:

All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:

Additional utlralink variations.

My Dashboard

FUNCTIONAL SPECIFICATIONS

DESCRIPTION: The minimized user dashboard always appears at the bottom of every page for quick access to the profile, toy collection, wish list and other metagame CTAs.

A. NORMAL STATE

At rest, the dashboard is minimized and dashboard links are hidden. The user can mouse over anywhere in the gray area to bring up the mouse-over state. On a tap device, tapping this area will expand the full dashboard.

B. MOUSE-OVER STATE

On rollover, the four dashboard links appear. When the user is logged in, he can click a link to expand that panel. When the user is logged out, none of the links are clickable.

C. PROFILE BUTTON

This button expands the profile panels of the dashboard. The profile view is the default view.

D. COLLECTION/WISH LIST BUTTON

This button expands the collection/wish list panels of the dashboard. Note: Copy is FPO.

This button will not be available to click at launch in worldwide markets where toys are not available. This button will be grayed out with a lock icon.

E. TOURNAMENTS/MISSIONS BUTTON

This button expands the tournaments/missions panels of the dashboard. Note: Copy is FPO.

F. ENTER CODE BUTTON

This button expands the enter code panels of the dashboard. Note: Copy is FPO.

Mini-game Unlockables in Dashboard will be introduced in a future phase (TBD). Do-able but complex so recommend for Phase 2.

Tournament ticker will be added to the Dashboard in a later phase (TBD). This should launch with tournaments.

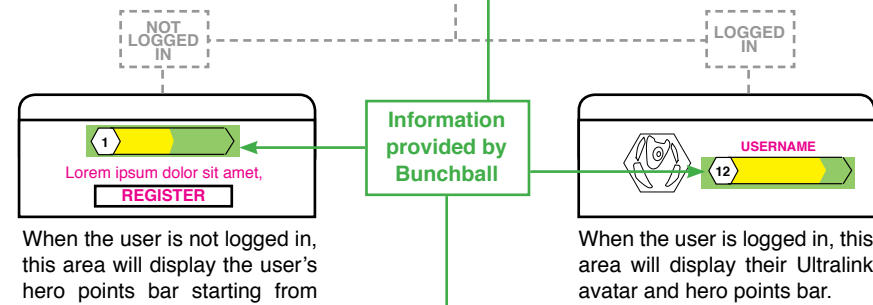

LOCALIZATION:

All text on this page will be localized for language. Content will remain the same across all markets.

FUNCTIONAL SPECIFICATIONS

DESCRIPTION: This page shows the mouse-over state of the dashboard footer when the user is not logged in.

A. HERO PROGRESS BAR
The user's hero points are stored in an anonymous Bunchball account and displayed in a hero bar starting from level 1. If the user registers during this session, the temporary points are transferred to the user's account.

B. REGISTER BUTTON
The user clicks here to bring up the login/register Jan-rain modal.

C. DASHBOARD BUTTONS (LOCKED)
When the user isn't logged in, the dashboard buttons are locked on mouse-over.

D. ACCESS DENIED POP-UP
When the user isn't logged in and clicks a dashboard button, this pop-up appears with a CTA.

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

Dashboard Clicked State

FUNCTIONAL ANNOTATIONS

DESCRIPTION: When the user is logged in, he can click on the minimized or mouse-over state of the dashboard to bring up the expanded view of the dashboard. On click, a user panel expands in the center and the left and right panels update to reflect the dashboard button the user clicks on. The default state of the dashboard is the Profile view.

A) EDIT ULTRALINK BUTTON
This button brings the user to the Ultralink Editor.

B) ULTRALINK IMAGE
This is the user's Ultralink avatar. If a user does not create an avatar during registration, the default Ultralink avatar will be shown here. Customized avatars will be stored in a supplemental database along with other user settings.

C) USERNAME
The user's registered username will be pulled via **Janrain** integration.

D) HERO LEVEL
This shows the level that the user is currently at. Data for the hero level will be pulled from Bunchball. This contains two elements.
1) Level Number
2) Progress Bar to Next Level

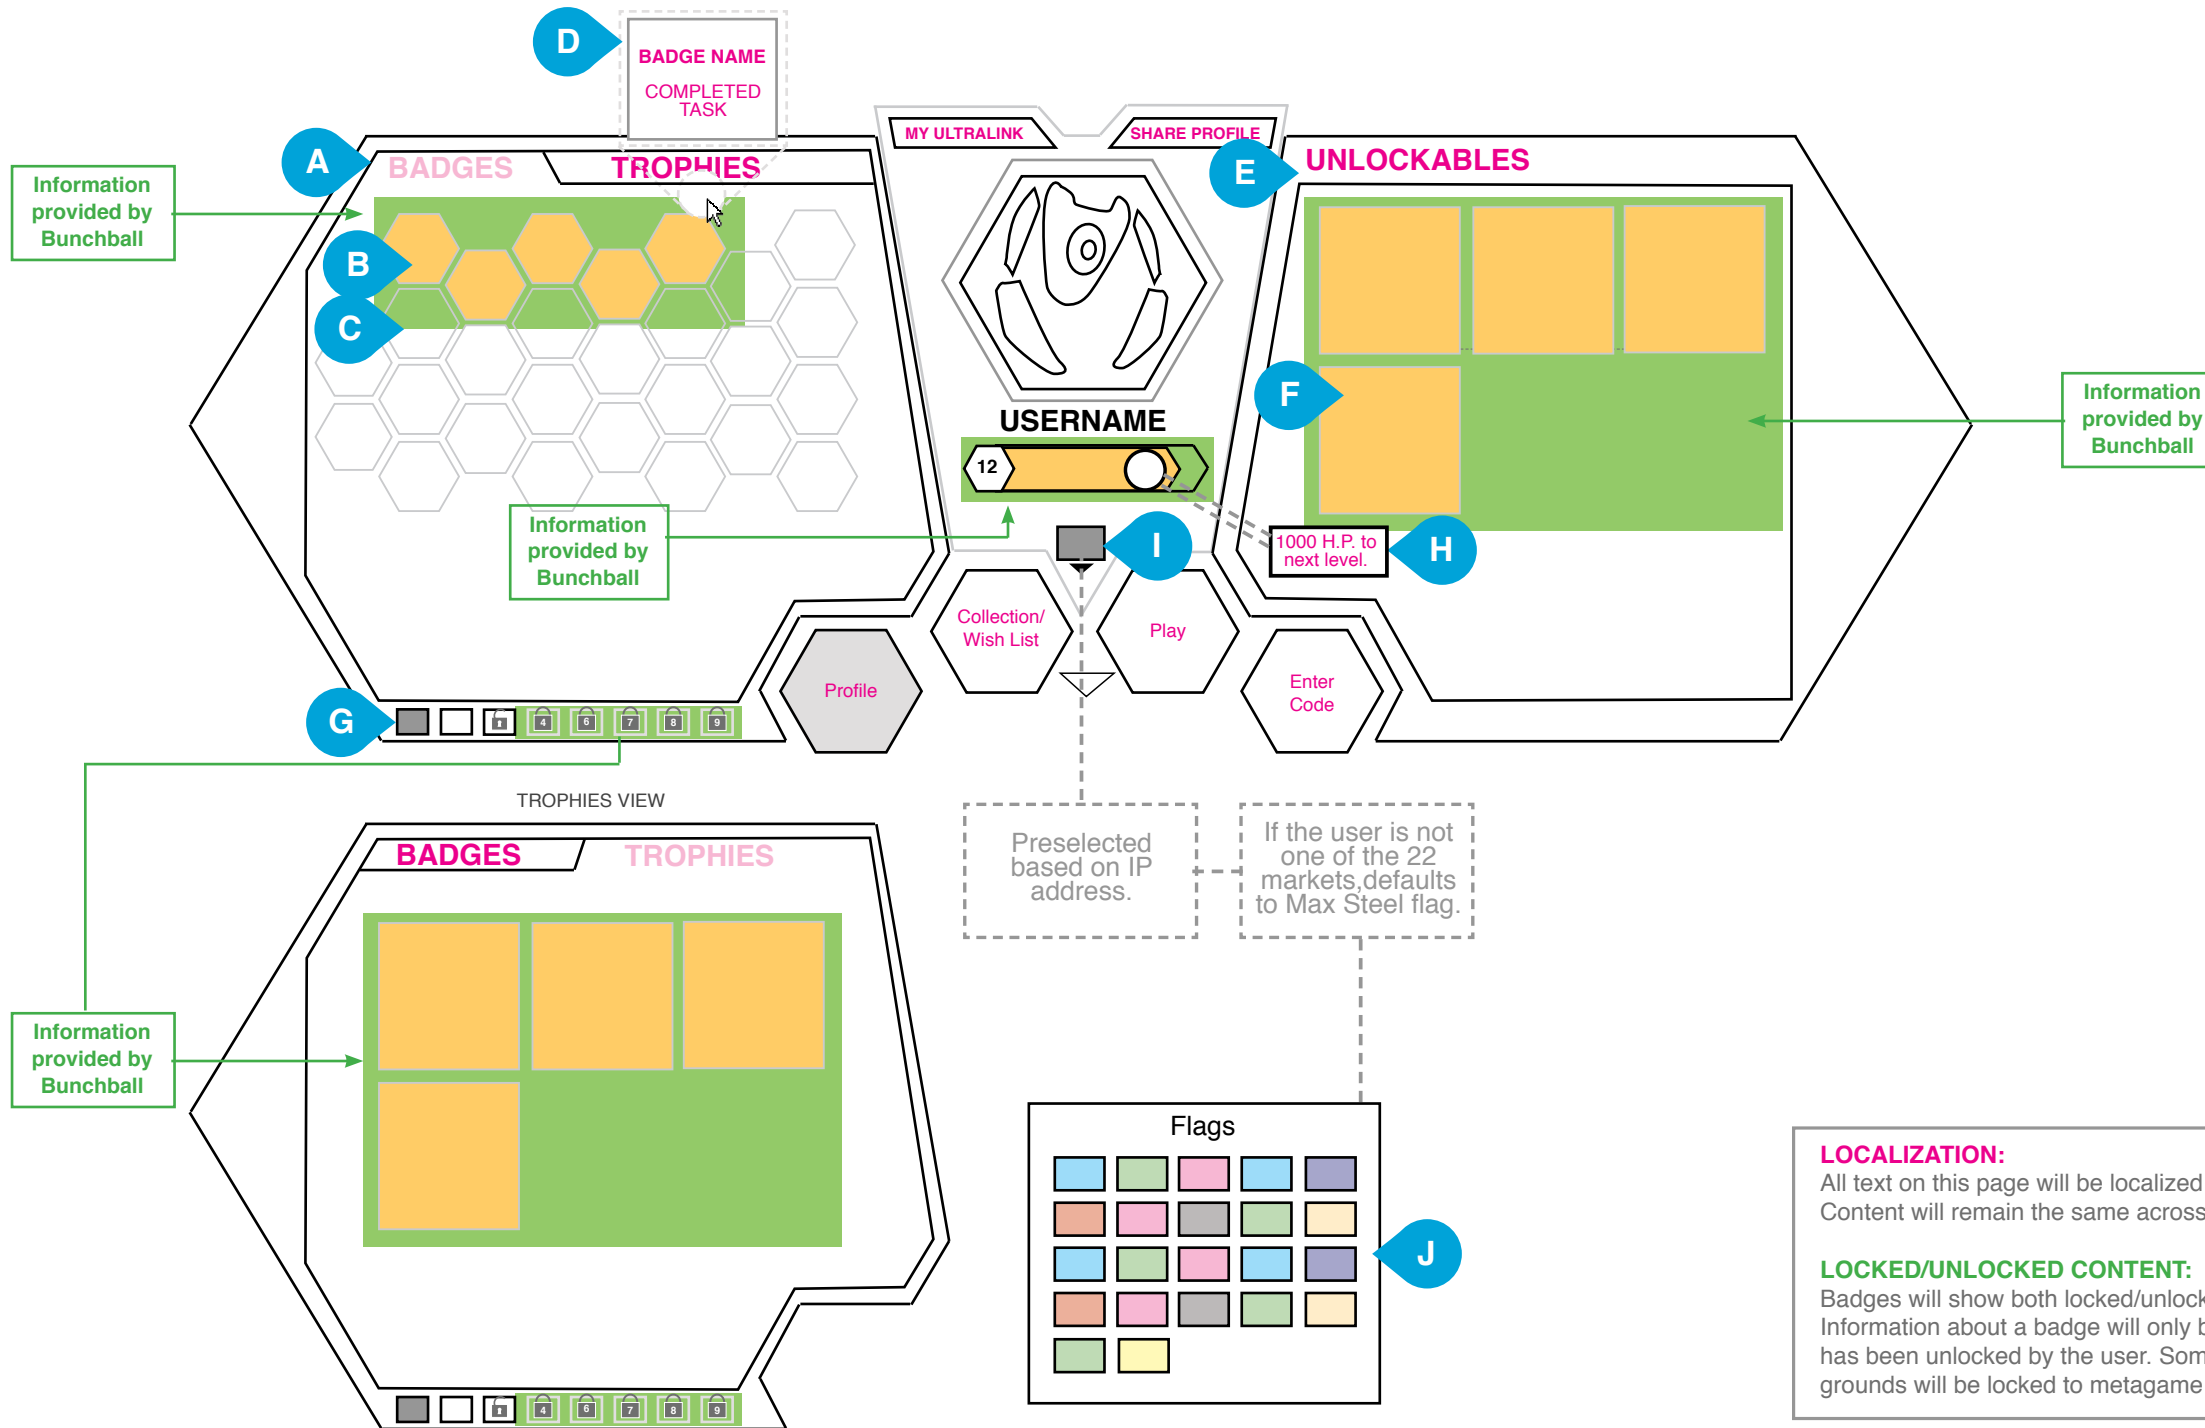

E) GAME HERO POINTS
This is the total number of game HERO POINTS that the User has accrued. This data will be pulled from Bunchball.

User Experience and Information Architecture	
File: MTL_MaxSteel_UX_7.0.indd	v 7.0
Last Modified: 12/20/12	68 of 85

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: The Profile panel features the user's badges and trophies. The user can see the badges and trophies he has unlocked and roll over or tap them to see a short description. The user can choose a background for each panel, further customizing how his profile is displayed to other users.

A. BADGES/TROPHIES PANEL

In the Profile View, the left panel displays all of the available badges, with a distinction between the badges the user has unlocked and not yet unlocked. The user can toggle between seeing the badges and the trophies.

B. UNLOCKED BADGE

Unlocked badges are displayed in full color. User can roll over an unlocked badge to see the information pop up for that badge. Badge states are pulled from **Bunchball**.

C. LOCKED BADGE

Locked badges are grayed out. User cannot click or roll-over locked badges. Badge states are pulled from **Bunchball**.

D. INFORMATION POP-UP

The information pop-up displays the badge or trophy name and a short description.

E. UNLOCKABLES PANEL

In the Profile View, the right panel displays all of the unlockables that the user has won.

F. UNLOCKABLE

Each trophy will be displayed in full color. User can rollover a trophy to see the information pop-up for that trophy. Trophies are pulled from **Bunchball**.

G. BACKGROUNDS

User may select a custom background for their badges panel. The custom background will show up whenever this panel is displayed, including when other players are viewing the user's profile. Some backgrounds require a hero level clearance to be unlocked.

H. HERO POINT LEVEL UP POP-UP

When the use mouses over the hero bar, this pop-up appears showing the amount of points to the next level.

I. COUNTRY INDICATOR/SELECTOR

The user's country is indicated here. The user can change the country via a pull-down menu (arrow) when clicked.

J. FLAG SELECTOR

The user selects their flag from this pop-up window.

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:
Badges will show both locked/unlocked content. Information about a badge will only be shown after it has been unlocked by the user. Some custom backgrounds will be locked to metagame level.

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: The My Toys panel features the user's Toy Collection and Wish List. The user can add toys from the Toy section and manage both lists here.

A. MY TOY COLLECTION PANEL

In the Toys View, the left panel displays the items that the user has added to his Toy Collection. (Self-reported)

B. TOY/PRODUCT ITEM

Clicking on a toy brings the user to the product detail page for that toy. User can click on the 'X' to delete an item from the collection. This action cannot be undone.

C. ADD A TOY TO COLLECTION CTA

Clicking on the CTA brings the user to the top level of the Toy section to add more toys. (4.0)

D. SCROLL BAR

When there are more items than can fit the screen, a scroll bar will appear to allow the user to scroll up and down through the collection list.

E. WISH LIST PANEL

In the Toys View, the right panel displays the items that the user has added to his Wish List.

F. WISH LIST ITEM

Clicking on a toy image or name brings the user to the product detail page for that toy.

G. MARK AS HAVE BUTTON

Clicking on this moves the item to the collection area.

H. DELETE ITEM

User can click on the delete button to delete an item from the wish list. This action cannot be undone.

I. MOVE ITEM UP/DOWN

User can click and drag an item up and down on the list to establish a priority/order.

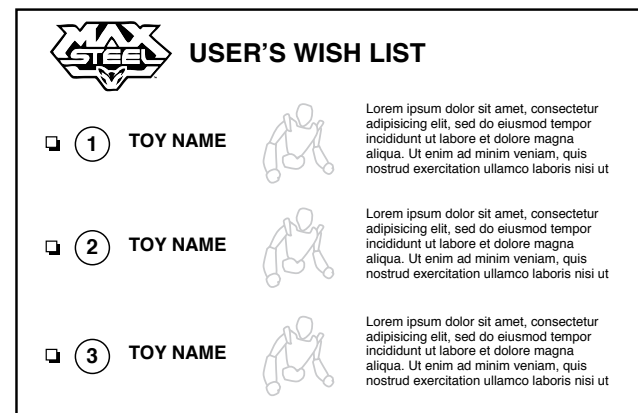

J. ADD A TOY TO WISHLIST CTA

Clicking on the CTA brings the user to the top level of the Toy section to add more toys. (4.0)

clicking on a toy image or name will bring the user to the product detail page for that toy.

Information provided by Bunchball

THE PRINTED VIEW FOR THE WISHLIST DISPLAYS A SIMPLE ORDERED LIST WITH A SHORT DESCRIPTION OF EACH TOY.

LOCALIZATION:
All text on this page will be localized for language. All toy content will be localized to only display toys available in the user's country/market. (Note: What happens if the user tries to view his wish list from a different country?)

LOCKED/UNLOCKED CONTENT:

CONTINUED ON NEXT PAGE...

CONTINUED...

K. SCROLL BAR

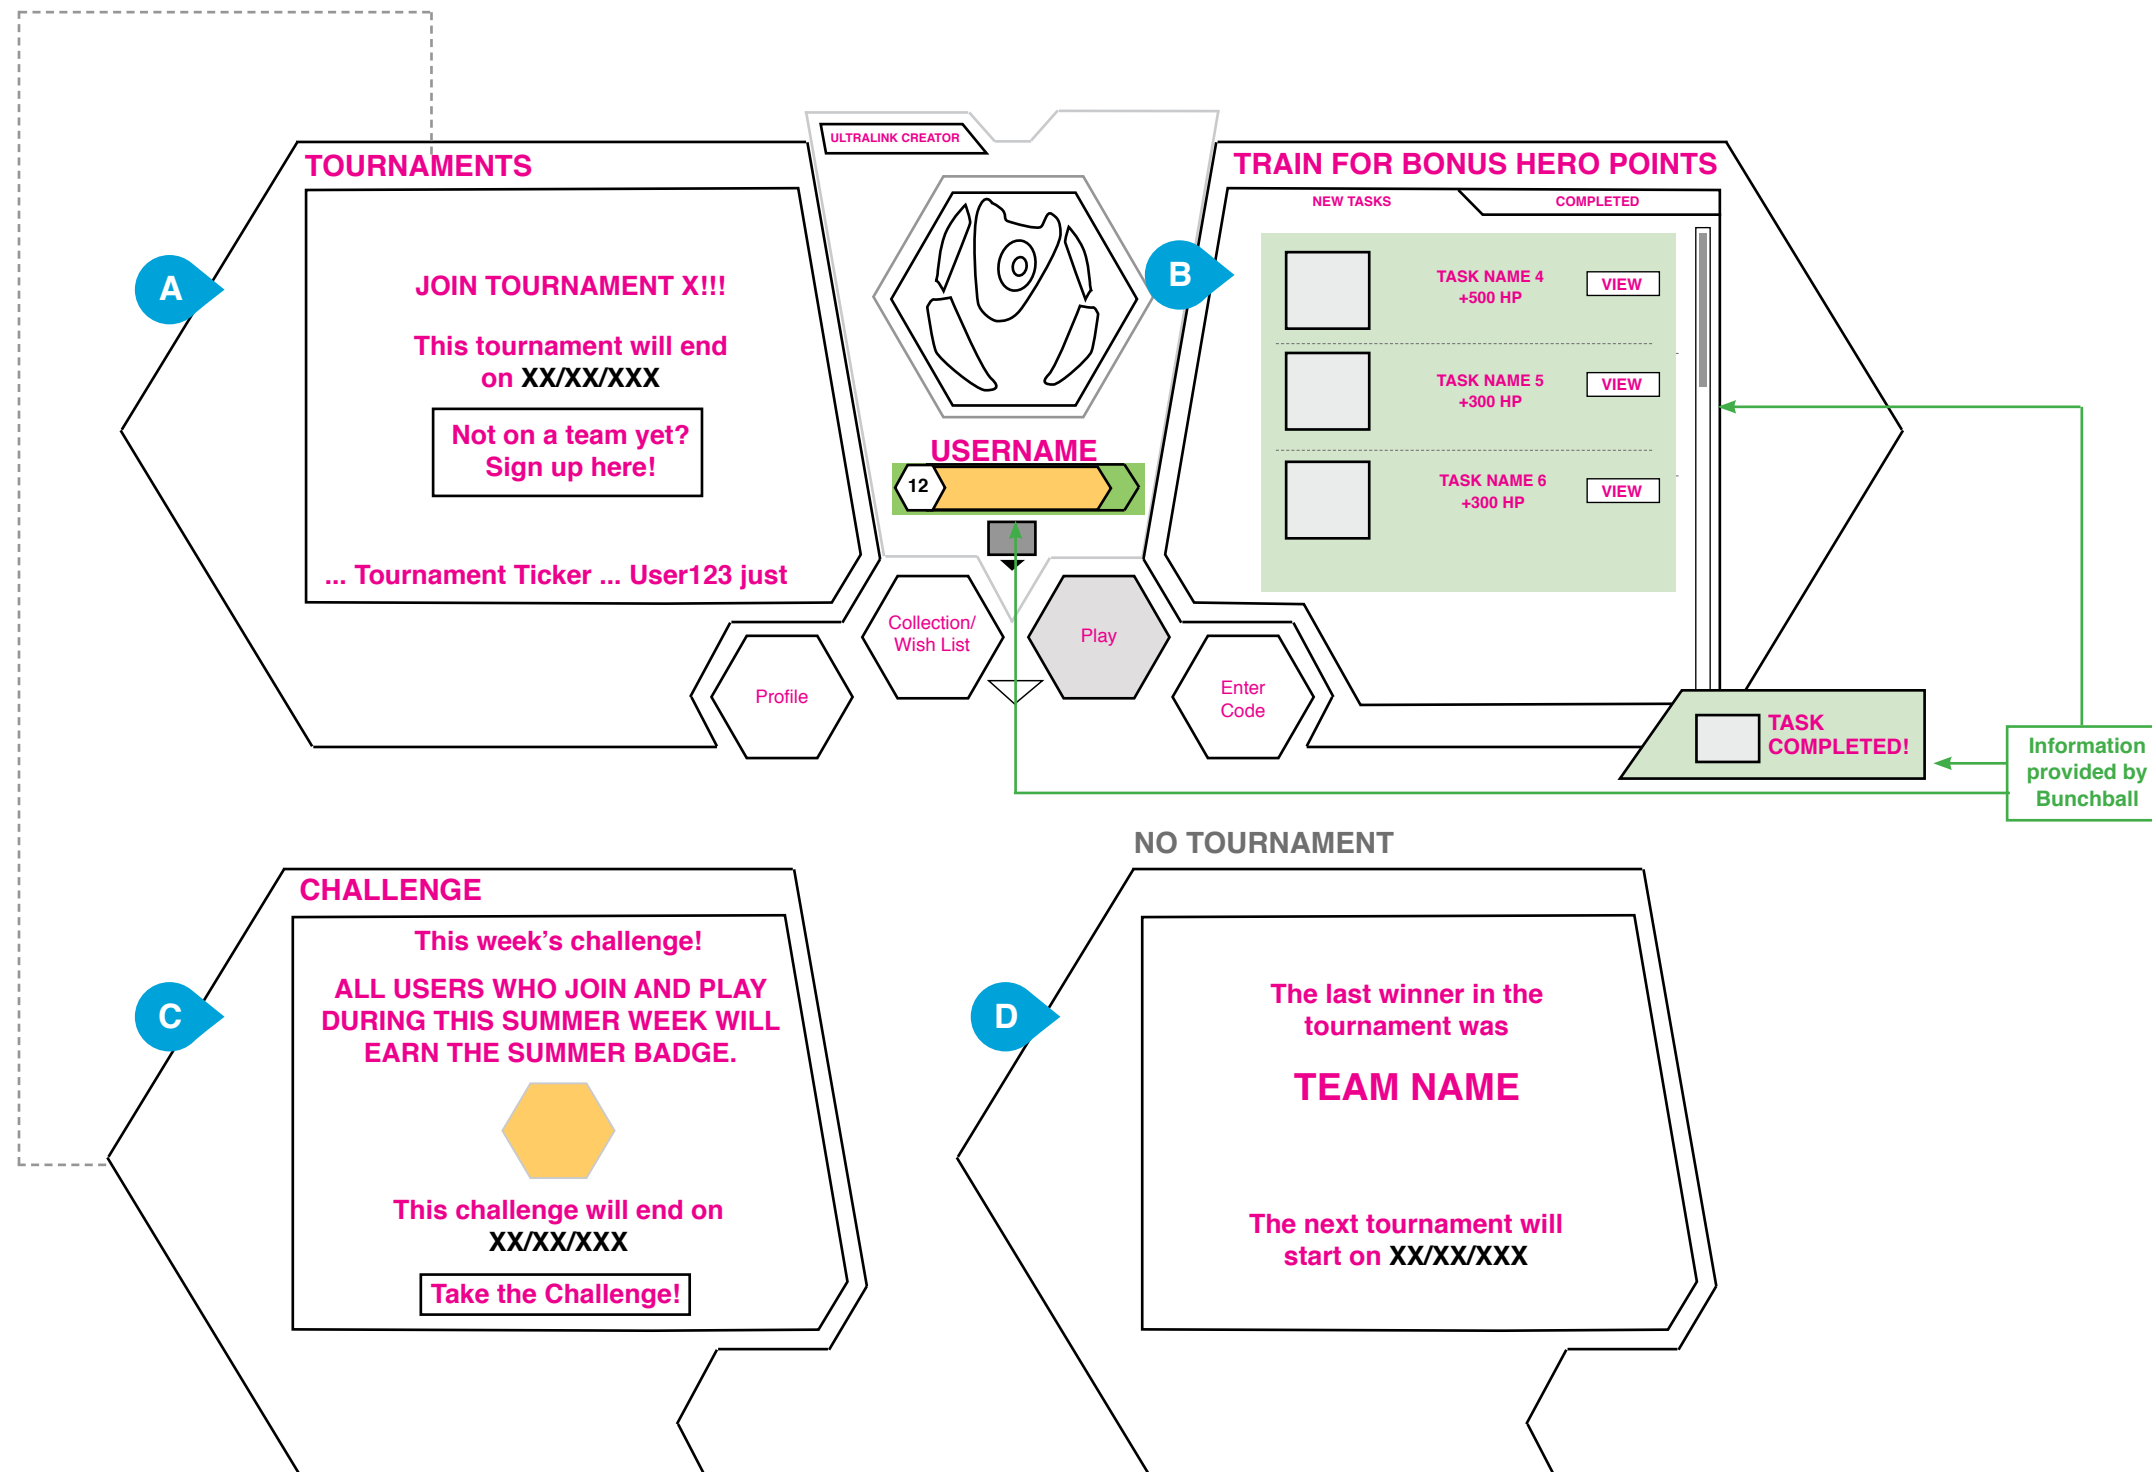

When there are more items than can fit the screen, a scroll bar will appear to allow the user to scroll up and down through the collection list.

L. PRINT WISH LIST

User clicks to send wish list to printer. A printer-friendly version will be created. (See left)

M. EMAIL WISH LIST

User clicks to bring up a modal window. (See next page.)

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: The Game panel shows Tournament information on the left and metagame/mission information on the right. At the end of a tournament the winner needs to be immediately identified and announced on the announcement page.

A. TOURNAMENT PANEL
This panel displays the tournament information (7.3.1).

B. TASKS PANEL
This panel displays the tasks information (7.3.7).

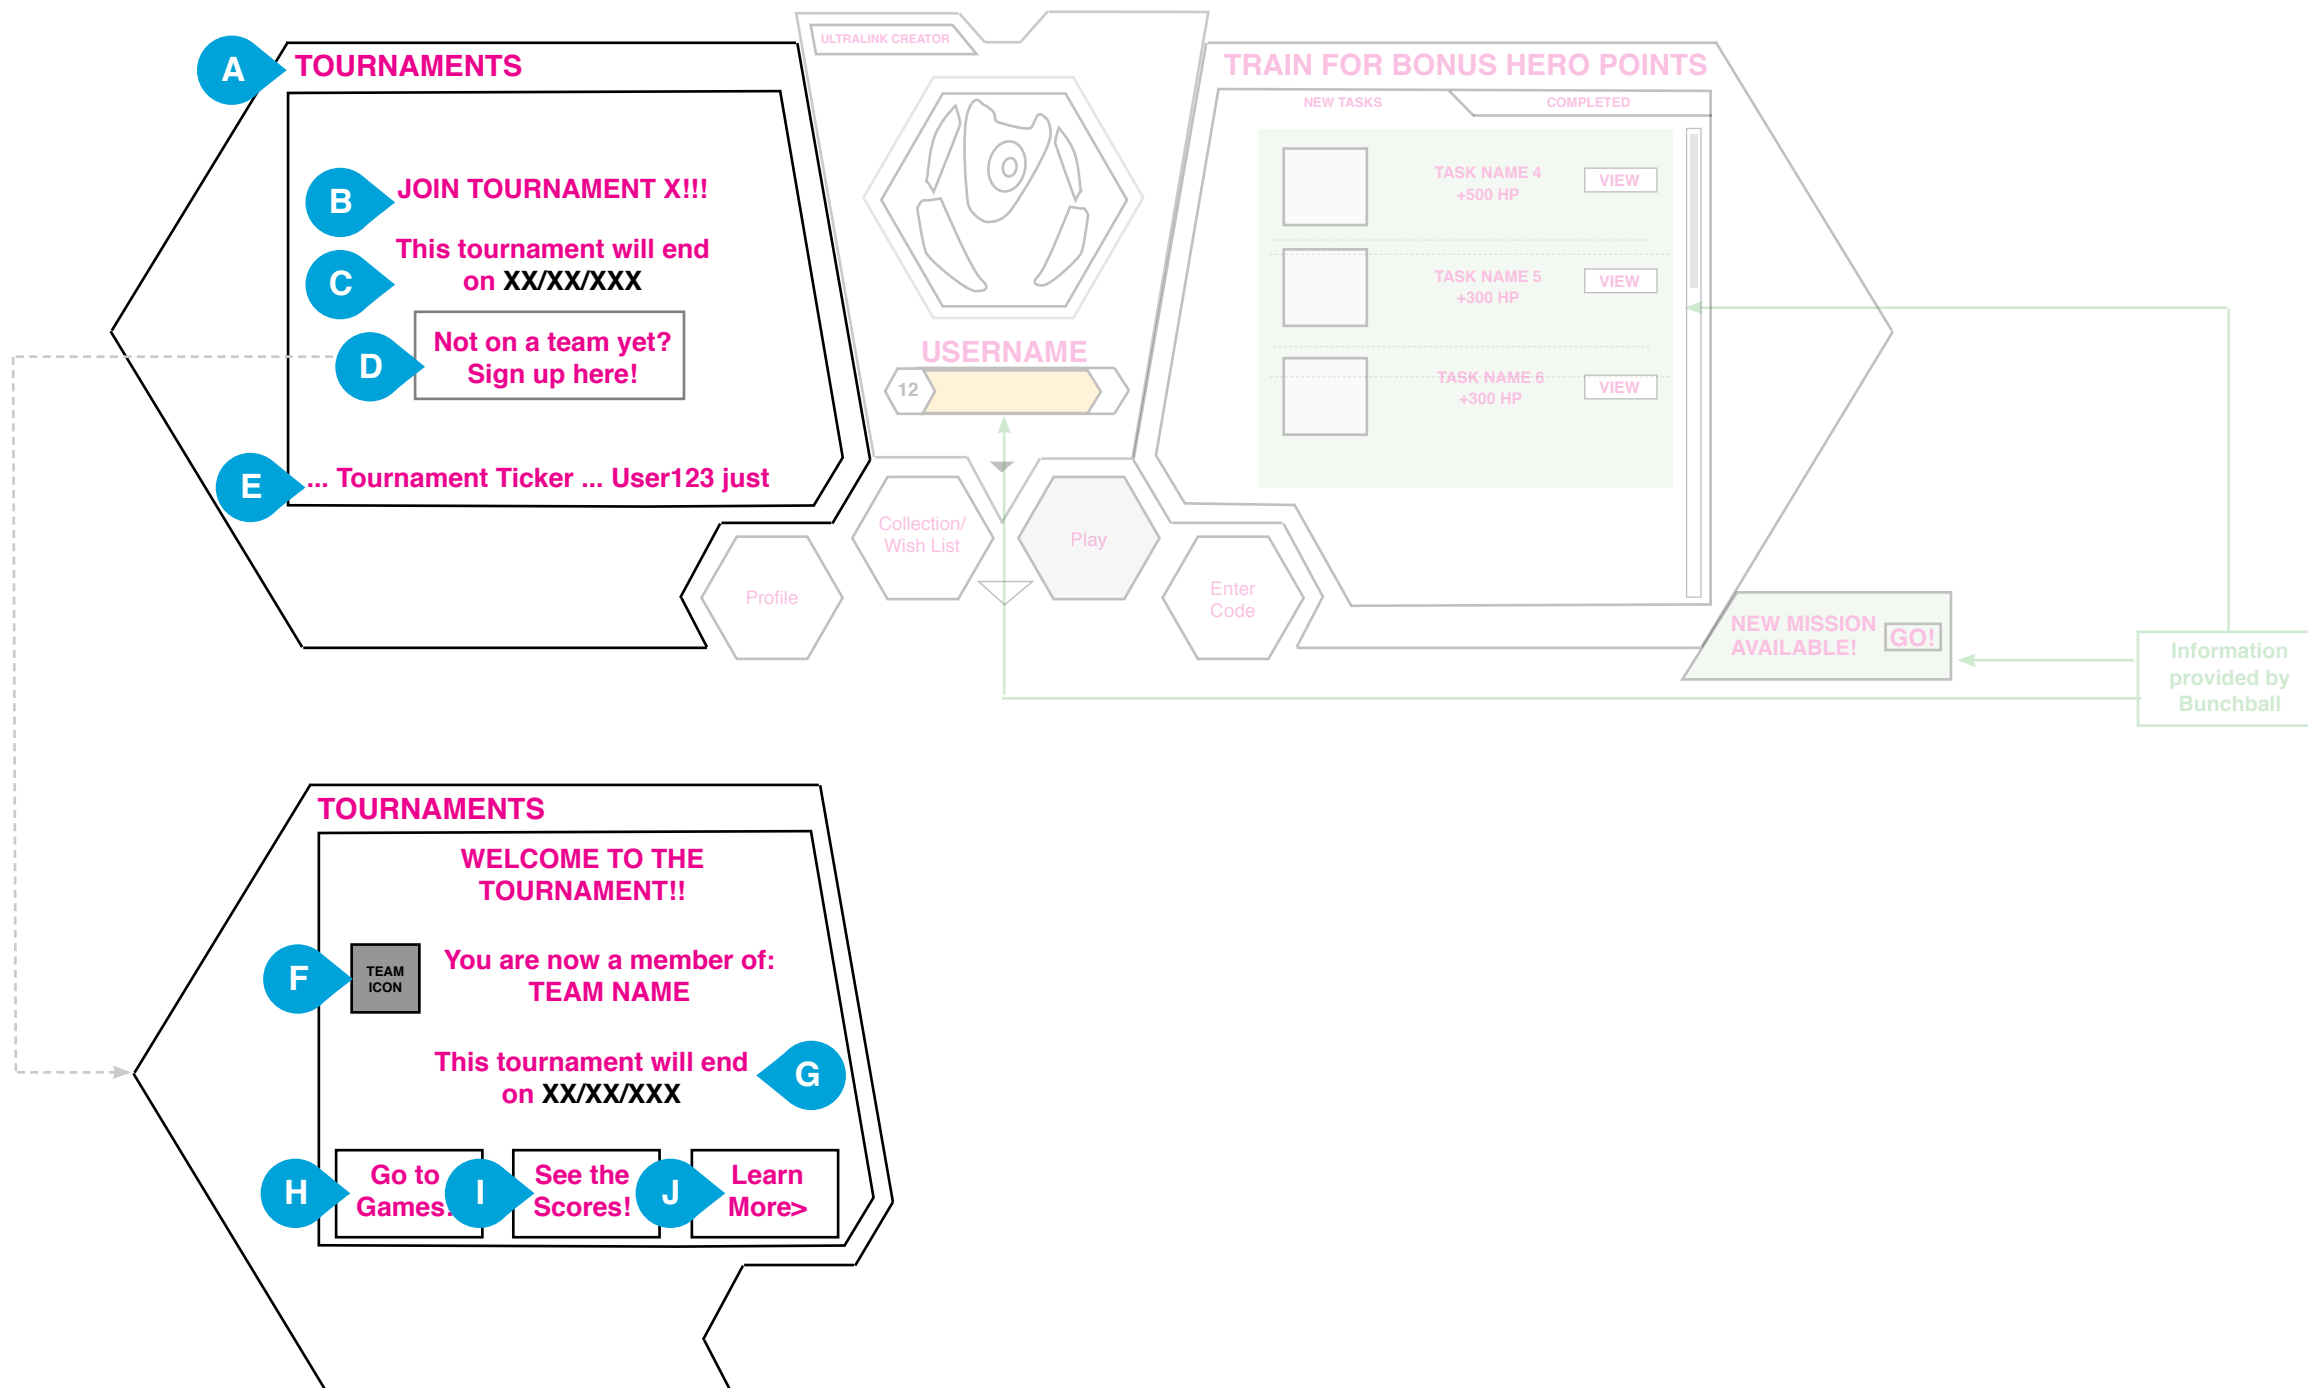

C. CHALLENGE PANEL
This panel displays the challenge information (7.3.6).

D. NO TOURNAMENT PANEL
This panel displays the tournament information after the tournament has ended.

Tournament will be introduced in v2.0

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:
Tournament will be locked until the user joins. User is not able to see the leaderboards or other information until they join.

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: When the user has joined a tournament, he will see current tournament stats in his Tournament Panel. This includes a tournament leaderboard, top players list and tournament history. There are 4 teams that the user is randomly added to (TBD). Users only need to opt-in once, and then are auto-assigned to the same team from that point on.

A. TOURNAMENT WINDOW
This is the window for The tournament before the user joins.

B. JOIN TOURNAMENT X TITLE
The title of the tournament.

C. TOURNAMENT ENDING DATE
This is the ending date for the tournament. The ending date is added in the CMS by the admin.

D. TOURNAMENT TICKER
This ticker shows tournament relation information in a cycle. This information includes but is not limited to:

- A tournament team moving up on the leaderboard. EX: [TEAMNAME] is now rank[#]
- A tournament team becoming point leader on the leaderboard. EX: [TEAMNAME] is now in the lead!
- [TEAM NAME] [USER] has scored XXXXX points. (Will only feature extraordinary point scores)
 - If tournament has low amount of participants ticker will feature ALL point contributions.

F. TEAM ICON
This is the icon of the team the user has joined.

G. TOURNAMENT END DATE
This is the ending date for the tournament. The ending date is added in the CMS by the admin.

D. GO TO GAMES BUTTON
Takes the user to the games page (1.0).

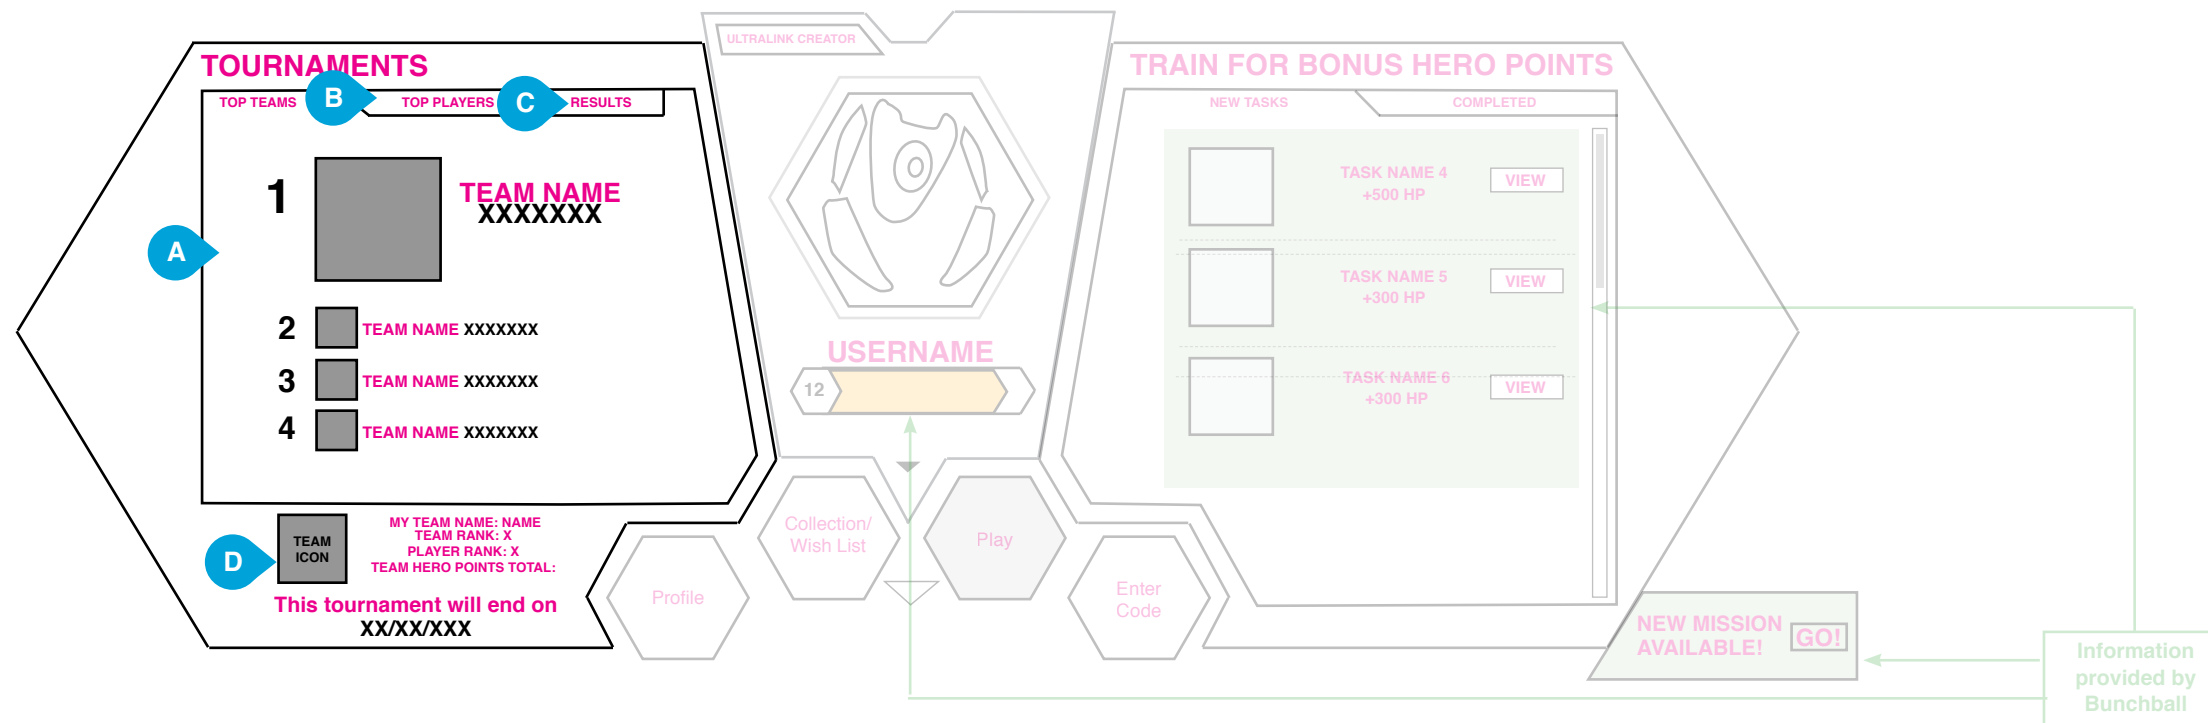

I. SEE THE SCORES BUTTON
Takes the user to the tournament scores thus far (7.3.3).

J. LEARN MORE BUTTON
Takes the user to the knowledge center (6.1).

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:
Tournament will be locked until the user joins. User is not able to see the leaderboards or other information until they join.

SCREEN DESCRIPTION: When a challenge becomes available, the user can join in. A challenge consists of all of the users making a certain amount of points in a set amount of time. The extension of a challenge and the outcome of the challenge is shown here. (7.3.6.2)

A. CHALLENGE PANEL
The challenge window shows the current challenge status.

B. CHALLENGE NAME
This is the name of the current challenge.

C. CHALLENGE BADGE
This is the image of the badge that the user can win.

D. UNLOCKABLE ITEM
This is the name of the item that gets unlocked if the user succeeds in the challenge. These items can be:
• Character bio
• Video
• Wallpaper

E. CHALLENGE END DATE
This is the end of the challenge. This needs to be set manually by the site admins.

F. TAKE THE CHALLENGE BUTTON
This button lets the user opt into the challenge. Next time the user sees this panel they see the challenged opted in format (7.3.6.1)

Challenges will be introduced in phase 2.5

LOCALIZATION:
All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:
Tournament will be locked until the user joins. User is not able to see the leaderboards or other information until they join.

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: When the user has joined a challenge, they will see current challenge stats in his challenge Panel.

A. CHALLENGE PANEL

When a user joins a challenge, the challenge panel updates to show the current status of the challenge.

B. CHALLENGE NAME

This is the name and information of the challenge the user is engaged in.

C. CHALLENGE BADGE

This is the image of the badge that the user can win.

D. UNLOCKABLE ITEM

This is the name of the item that gets unlocked if the user succeeds in the challenge. These items can be:

- Character bio
- Video
- Wallpaper

E. CHALLENGE STATUS BAR

This bar shows the variable (points, villains, time a villain is beaten) that consists of the challenge as well as a graphic bar graph. The challenge status can be either:

- Total community points
- Total villains beaten by the community (The community needs to beat X amount of villains)
- A Villain beaten by the community (The community needs to beat Dredd X amount of times)

F. CHALLENGE END DATE

This is the end of the challenge. This needs to be set manually by the site admins.

G. NEXT TOURNAMENT START DATE

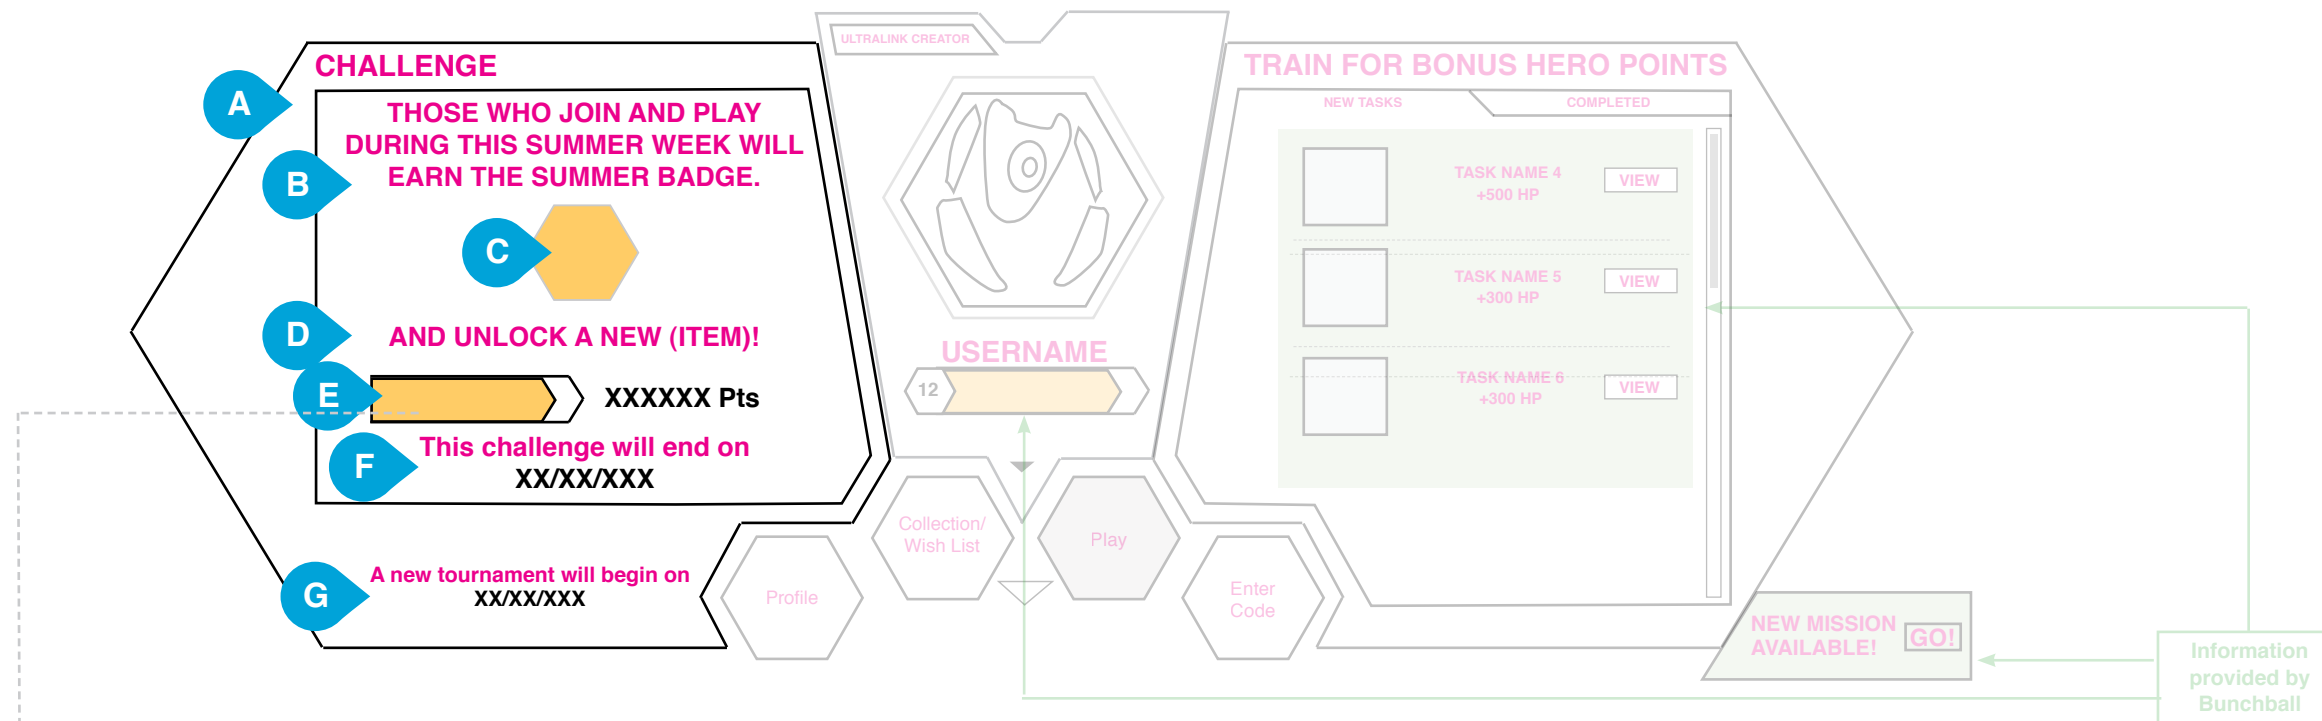

This is the start date of the next tournament. This information is entered into the CMS by the admin.

LOCALIZATION:

All text on this page will be localized for language. Content will remain the same across all markets.

LOCKED/UNLOCKED CONTENT:

Tournament will be locked until the user joins. User is not able to see the leaderboards or other information until they join.

CHALLENGE STATUS BAR EXAMPLES

FUNCTIONAL ANNOTATIONS

SCREEN DESCRIPTION: During the course of a challenge, the challenges window will change depending on whether the challenge has been extended, won or lost.

A. CHALLENGE EXTENDED PANEL
The challenge window updates when the challenge is extended as well as showing the current challenge status.

B. CHALLENGE NAME
This is the name of the current challenge.

C. CHALLENGE BADGE
This is the image of the badge that the user can win.

D. UNLOCKABLE ITEM
This is the name of the item that gets unlocked if the user succeeds in the challenge. These items can be:
